TruckEast >>

LIGHTEN THE LOAD WITH OUR CAMERA AND SAFETY SOLUTIONS

Increase your visibility and gain further control over your fleet with our camera and safety solutions, designed for all makes and models. The range takes advantage of the latest technology including 4G connectivity, DVR HD cameras, state-of-the-art software and built-in storage and can be tailored fully to meet your needs.

Key benefits available:

- ✓ Enhanced visibility
- ✓ Long life cameras
- ✓ Compliant audible warnings
- ✓ Blind spots covered
- ✓ Added driver awareness
- ✓ Reliable Sensors
- ✓ Instant access
- ✓ Comply with the latest legislations
- ✓ Independent witness in case of accidents and disputes

Whether you are looking to simply increase safety through enhanced visibility and driver awareness, comply with the latest standards and legislation or win that next contract, we've got the right package for you.

BASIC PACKAGE

Crystal clear footage
via our HD cameras

As standard our camera
solutions come with
1TB storage

ADDITIONAL FUNCTIONALITY AVAILABLE

10x faster than 3G, you have
instant access to download
your footage from our DVRs

Solutions can be
packaged with up-to
2TB storage space

Seamlessly stream your
fleets camera footage live to
any device

With built in telematics
you've no need for a
separate tracking solution

DIRECT VISION STANDARD SAFE SYSTEM

Be ready for London's Direct Vision Standard - the safety legislation based around a star rating that reflects the driver's visibility from the cab. Currently, all hgv's over 12 tonne will require a safety permit to drive into Greater London. Until October 2024 any vehicles with less than a one star rating will require a safe system before applying for a permit. After this point any vehicles rated 0-2 stars will require a progressive safety system. Full details of the progressive safety system are still to be confirmed.
