

XT Battery Electric Vehicle

Tipper R 400E B6X4 NA

Technical specifications

Cab	<ul style="list-style-type: none">– Scania R-series day cab with low roof height offers a spacious driver area enabling an optimum driving position. It also provides excellent storage areas and space for installing extra equipment in the cab.– Automatic Climate Control with air conditioning and heating system.
Engine	<ul style="list-style-type: none">– EM C1-4 is our electric machine with a four-speed gearbox with a fairly high gear ratio.– EM C1-4 is more energy efficient and lighter compared to EM C3-6.– Unbeatable in terms of starting ability and driveability. It can accelerate quickly even with a GTW up to 74 tons.– The truck is equipped with our 400 kW power level, but can be offered at 270, 300, 330 and 360 kW as well.
Gearbox	<ul style="list-style-type: none">– Gearbox GE14M1 has 4 gears and a neutral position. It is used in vehicles with fully electric propulsion and is assembled and integrated with the electric machine.
Battery	<ul style="list-style-type: none">– Installed capacity 416 kWh, with a State of Charge window of 83%, giving 345 kWh usable energy and a range of around 300 km.– More battery capacity options are available all depending on your operation and if you want to optimise the truck for longer range or higher payload.
Front axles	<ul style="list-style-type: none">– 9,000 kg.– Parabolic suspension.
Rear axles	<ul style="list-style-type: none">– 2 × 9,500 kg (19,000 kg).– Air suspension.– Comfortable driving experience.
XT equipment	<ul style="list-style-type: none">– The XT BEV comes with the robust steel front bumper protecting the cab and front equipment. It can be equipped with the full interior and exterior XT package.
