UPTIME AND MAINTENANCE

# MAXIMISING YOUR PRODUCTIVITY

Services 360 is a portfolio of service packages tailored to meet your business needs. It combines proactive repair and maintenance with digital tools and services that reduce manual administration, increase uptime and keep your operations running smoothly.

**Package options:**

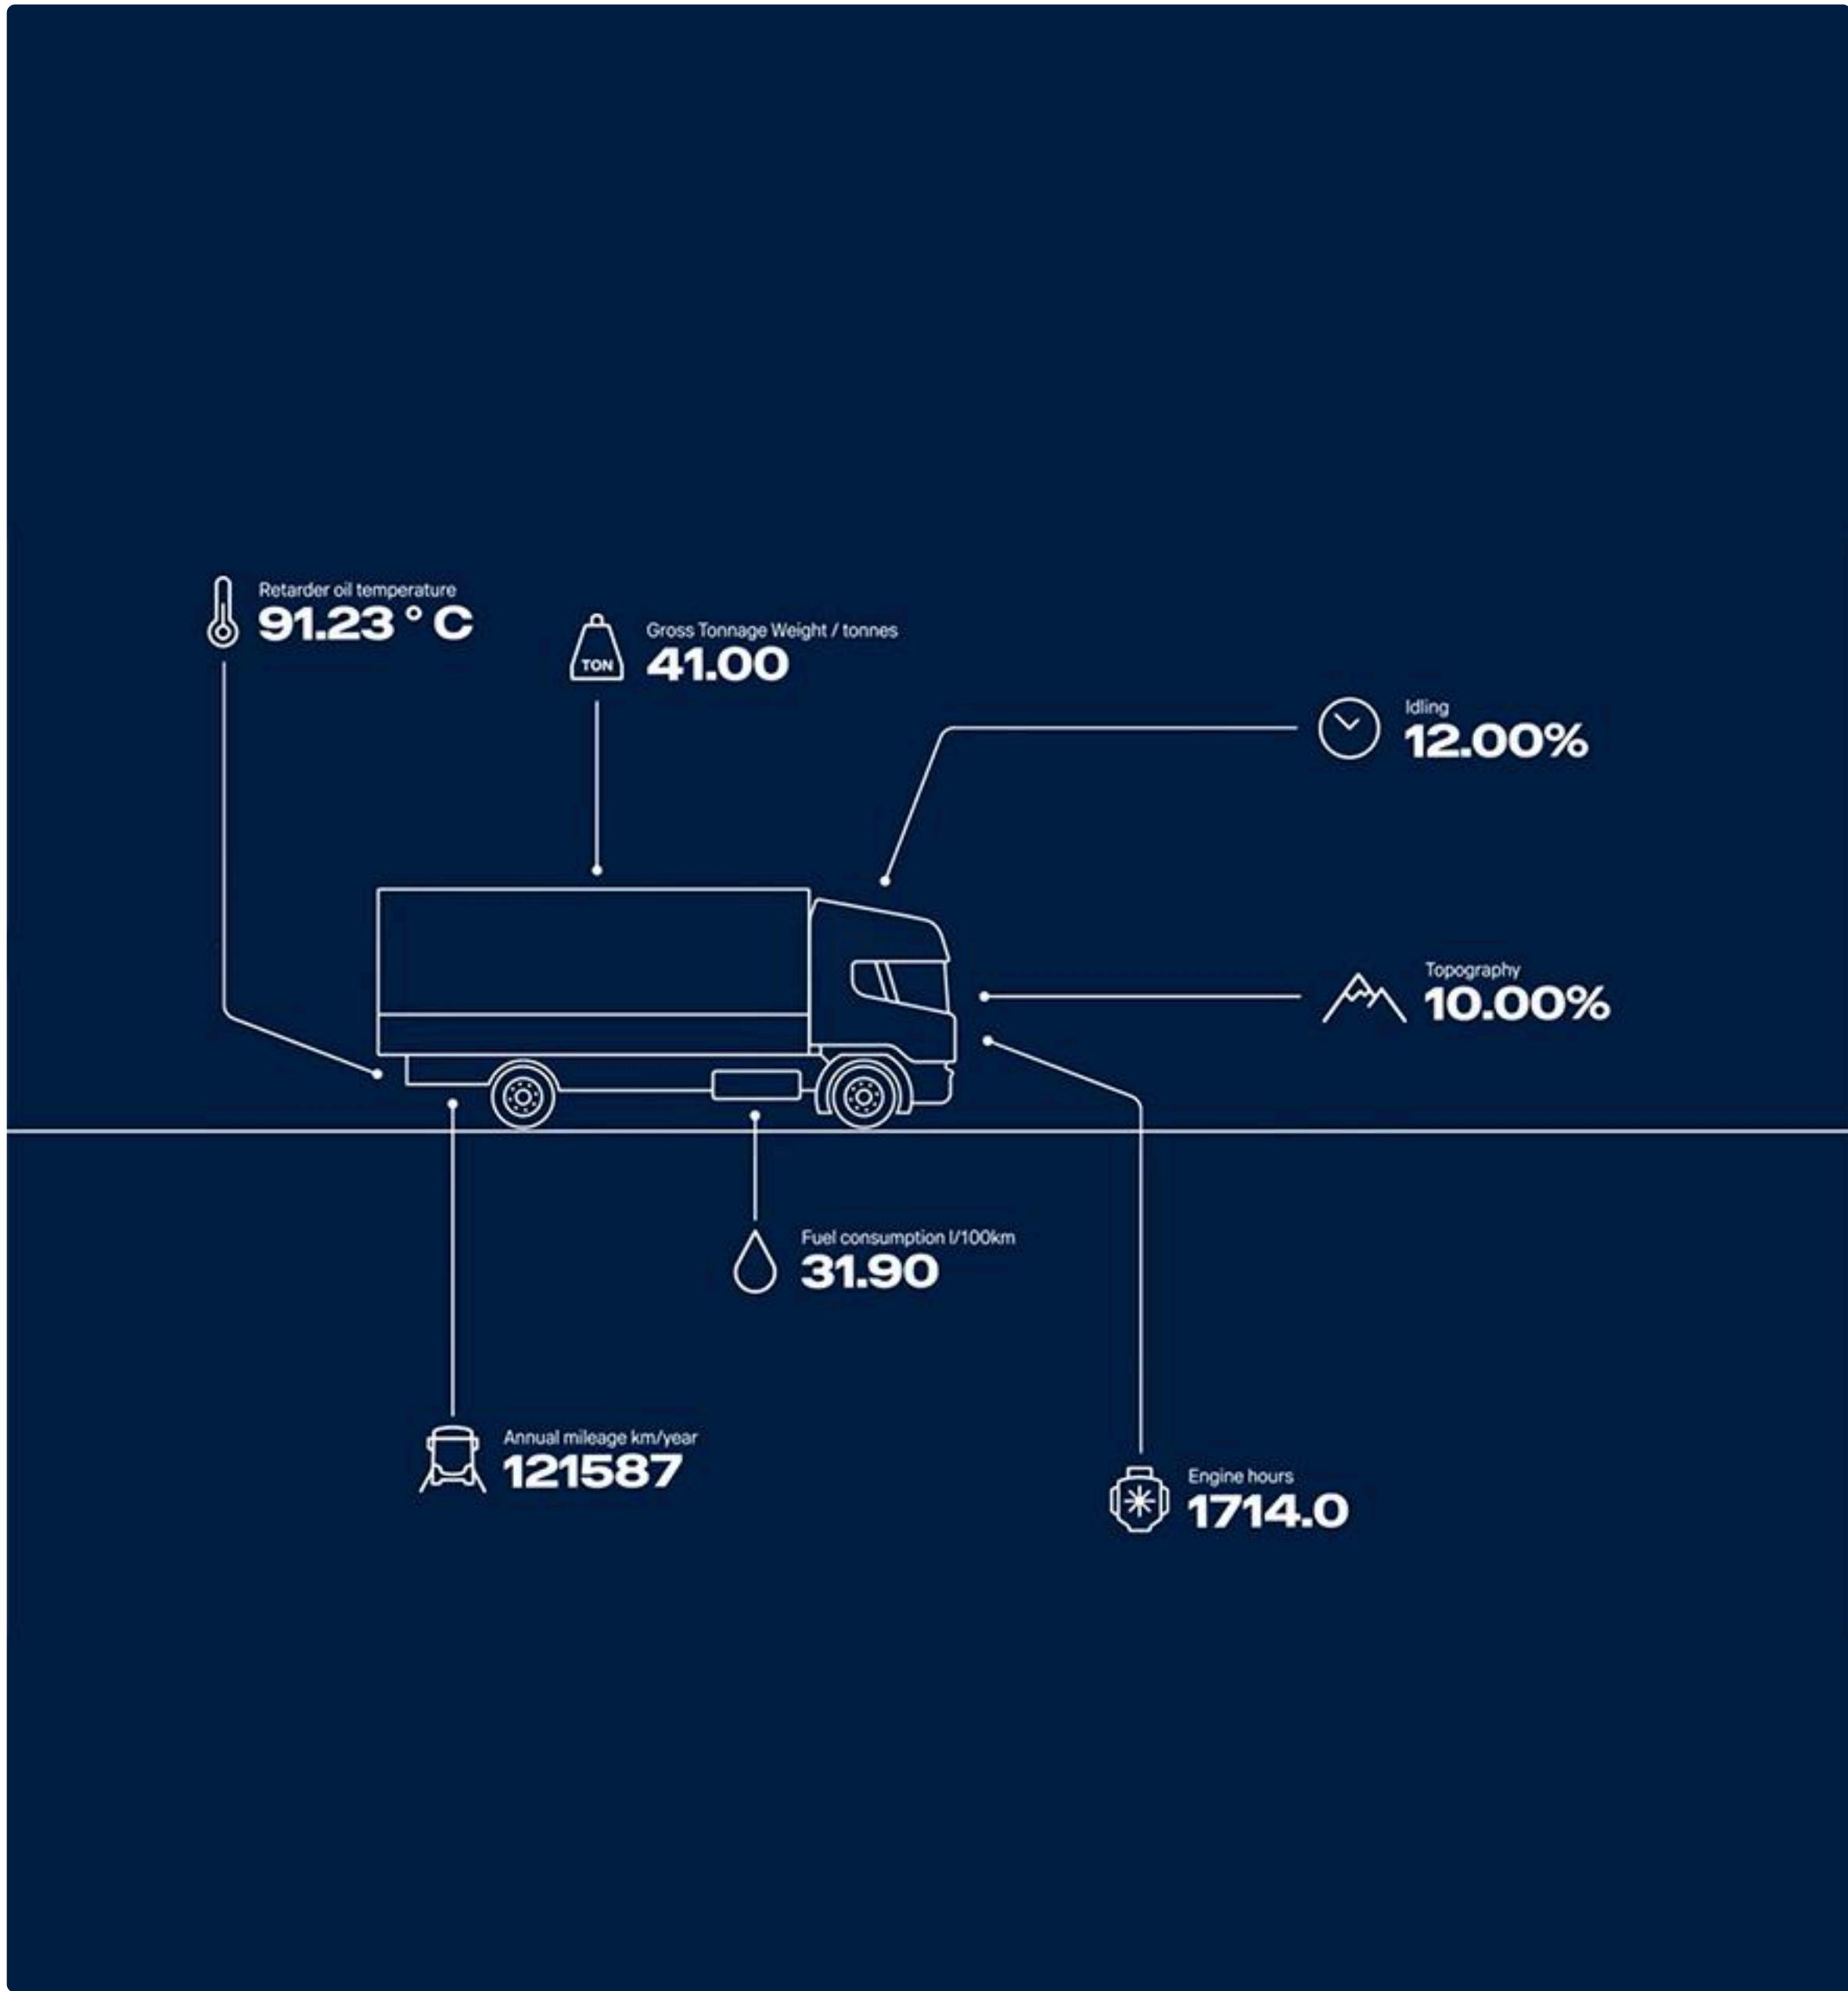

**Pro** – Proactive vehicle repair and maintenance coverage

**Full** – Full repair and maintenance coverage

**Plus** – Powertrain repair and vehicle maintenance

**Core** – Vehicle maintenance and digital services

SCANIA FLEXIBLE MAINTENANCE

# THE RIGHT MAINTENANCE AT THE RIGHT TIME

Scania Flexible Maintenance is a data-driven service that customises your truck's maintenance plans based on how the vehicle is actually used. No fixed intervals. No unnecessary stops. Just maintenance based on real data and vehicle usage.

- Maximises uptime, productivity and sustainability
- Tailored plans based on real-time operational data
- Up to one more day on the road thanks to increased uptime and the best technical coverage for your vehicle
- No unnecessary workshop visits

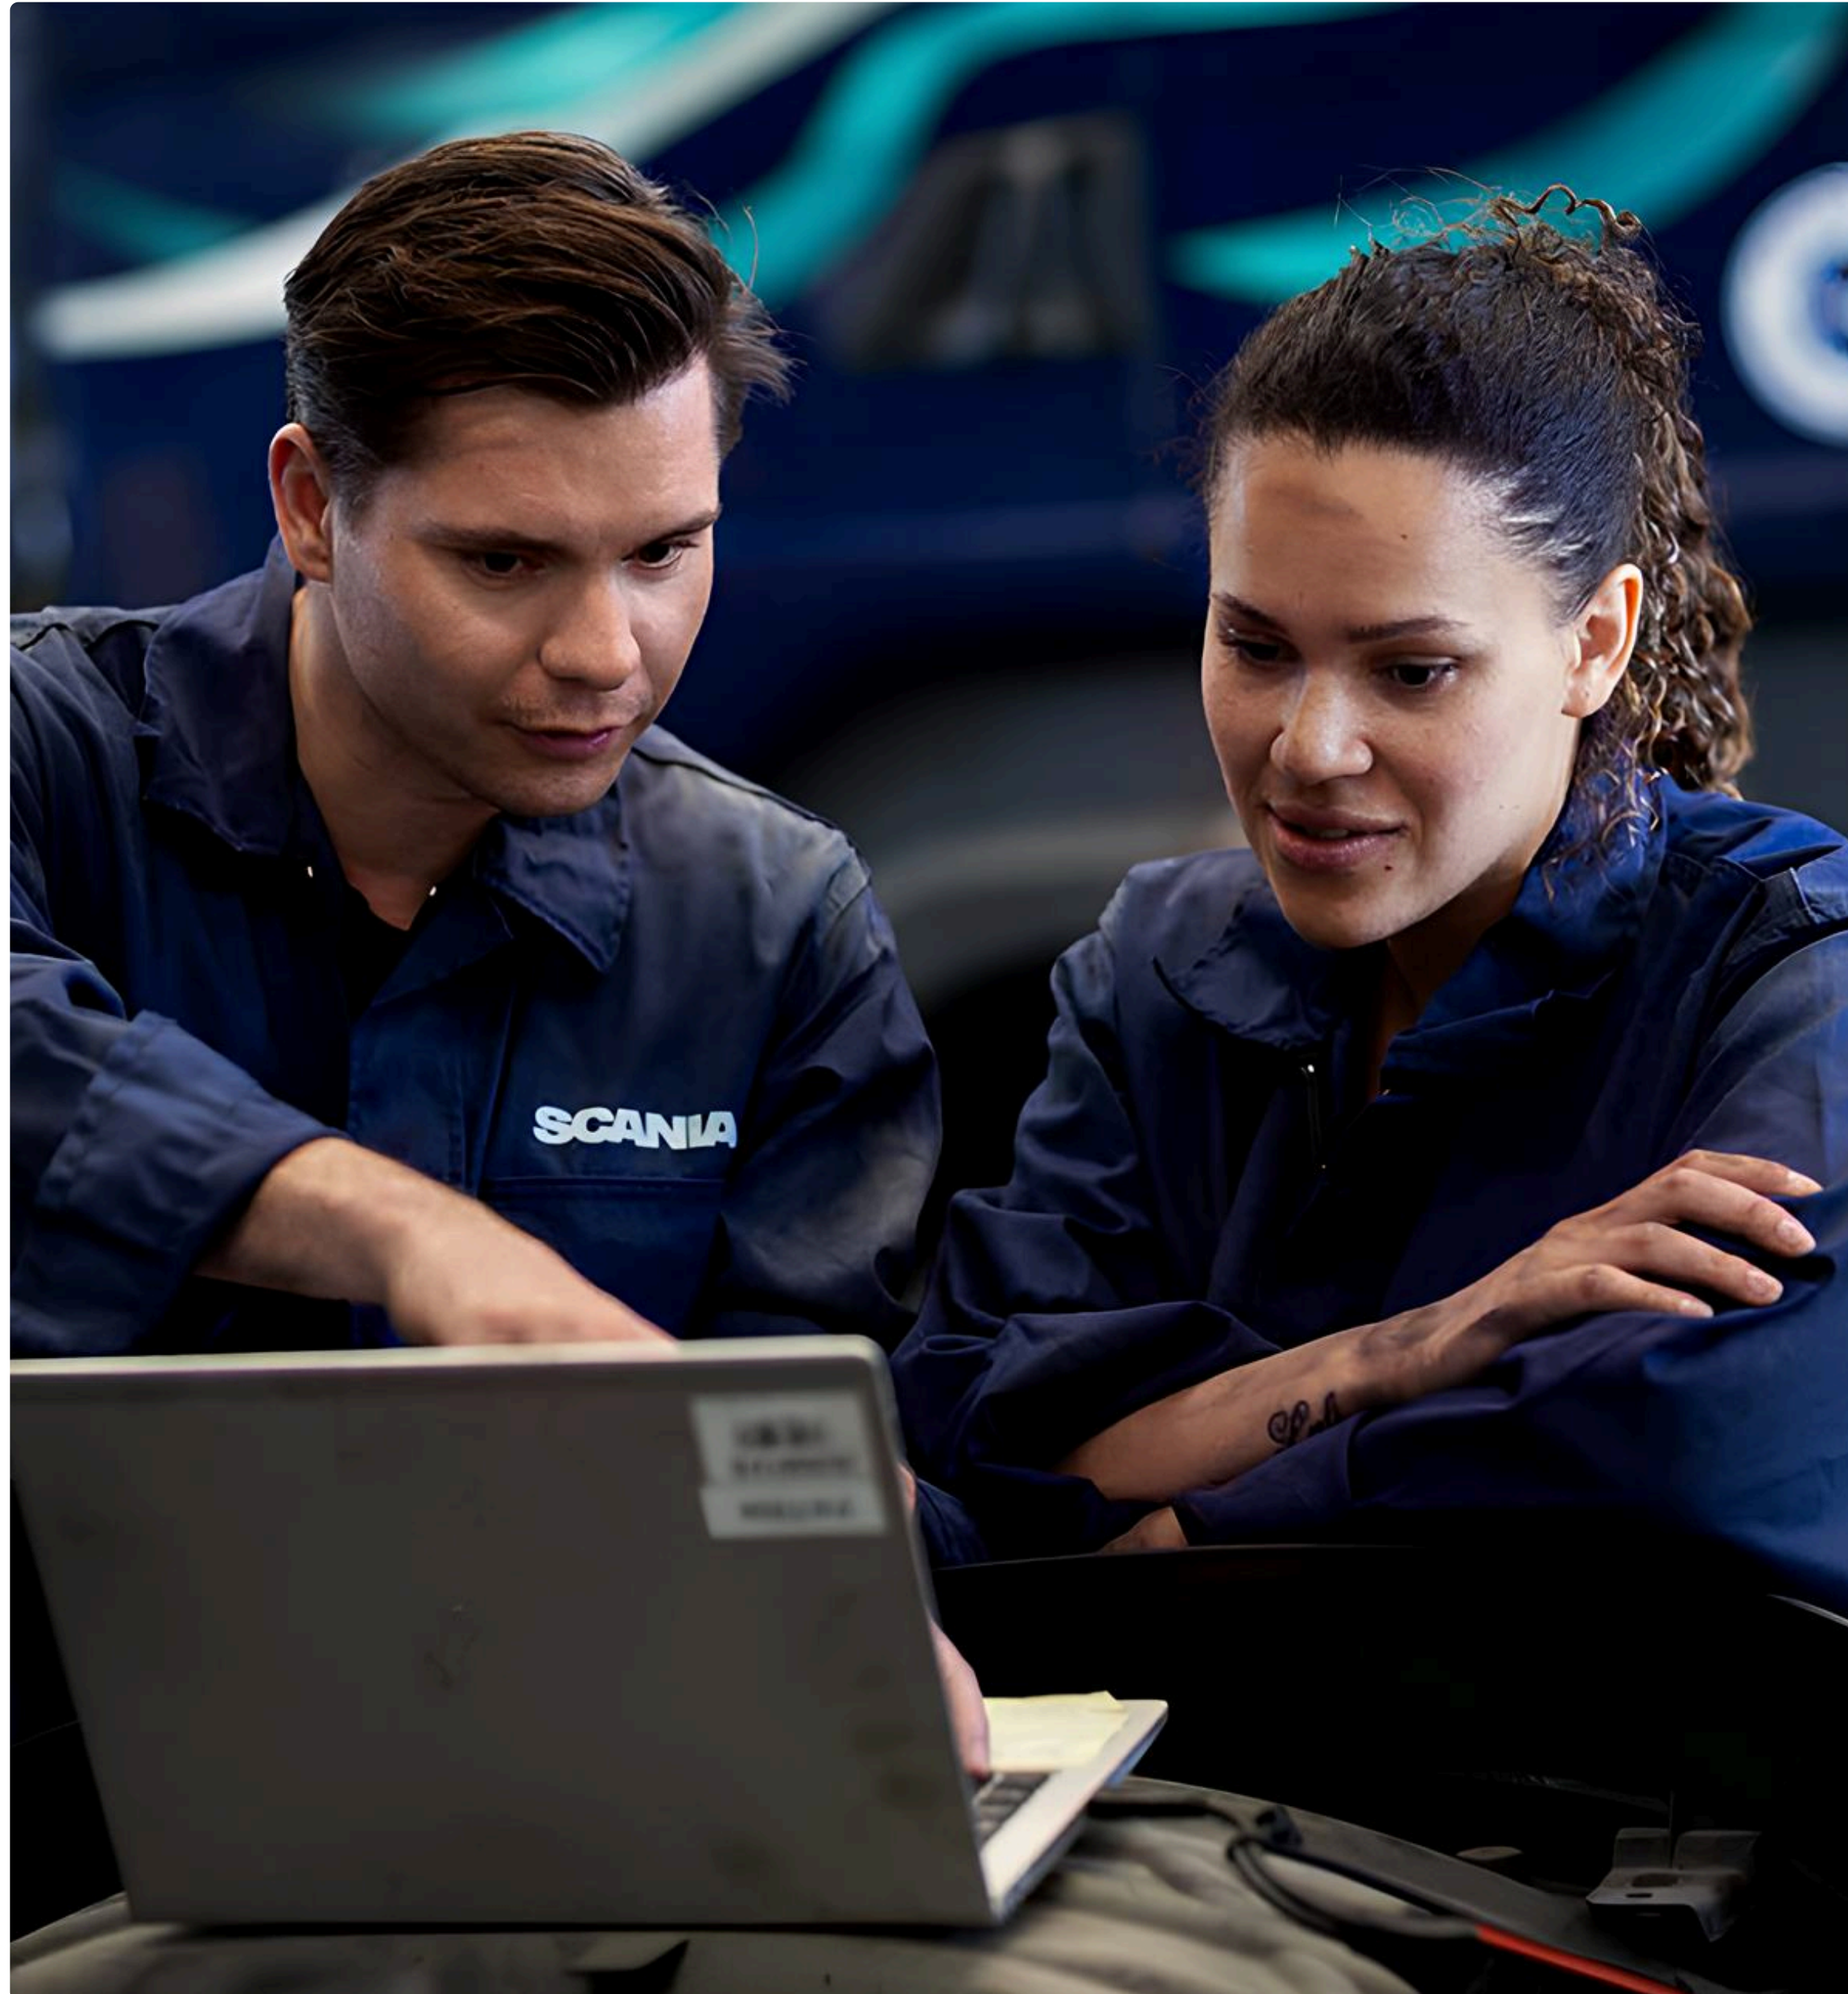

SCANIA PROCARE

# FOR UPTIME-CRITICAL OPERATIONS

Reduce the risk of unplanned stops with Scania ProCare's predictive component replacement service. By identifying potential issues early on through our state-of-the-art vehicle health monitoring, it helps prevent breakdowns before they happen.

- Predicts and prevents potential failures
- Reduces unplanned downtime
- Keeps trucks in peak operating condition
- Ideal for operations where uptime is business critical

## SCANIA SERVICE PLANNING

# STAY ONE STEP AHEAD OF YOUR REPAIR AND MAINTENANCE NEEDS

Scania Service Planning is your digital gateway to Scania workshops. It helps you focus on the vehicles that need your attention the most so you can take the right action at the right time. You can plan, book and track your workshop visits – all in one place.

### What's in it for you?

- Access workshop history and maintenance plans
- Maintenance status of your vehicles
- Book and track workshop visits
- Create and follow up on check lists for drivers
- Act on defects reported by drivers to avoid downtime

MY SCANIA

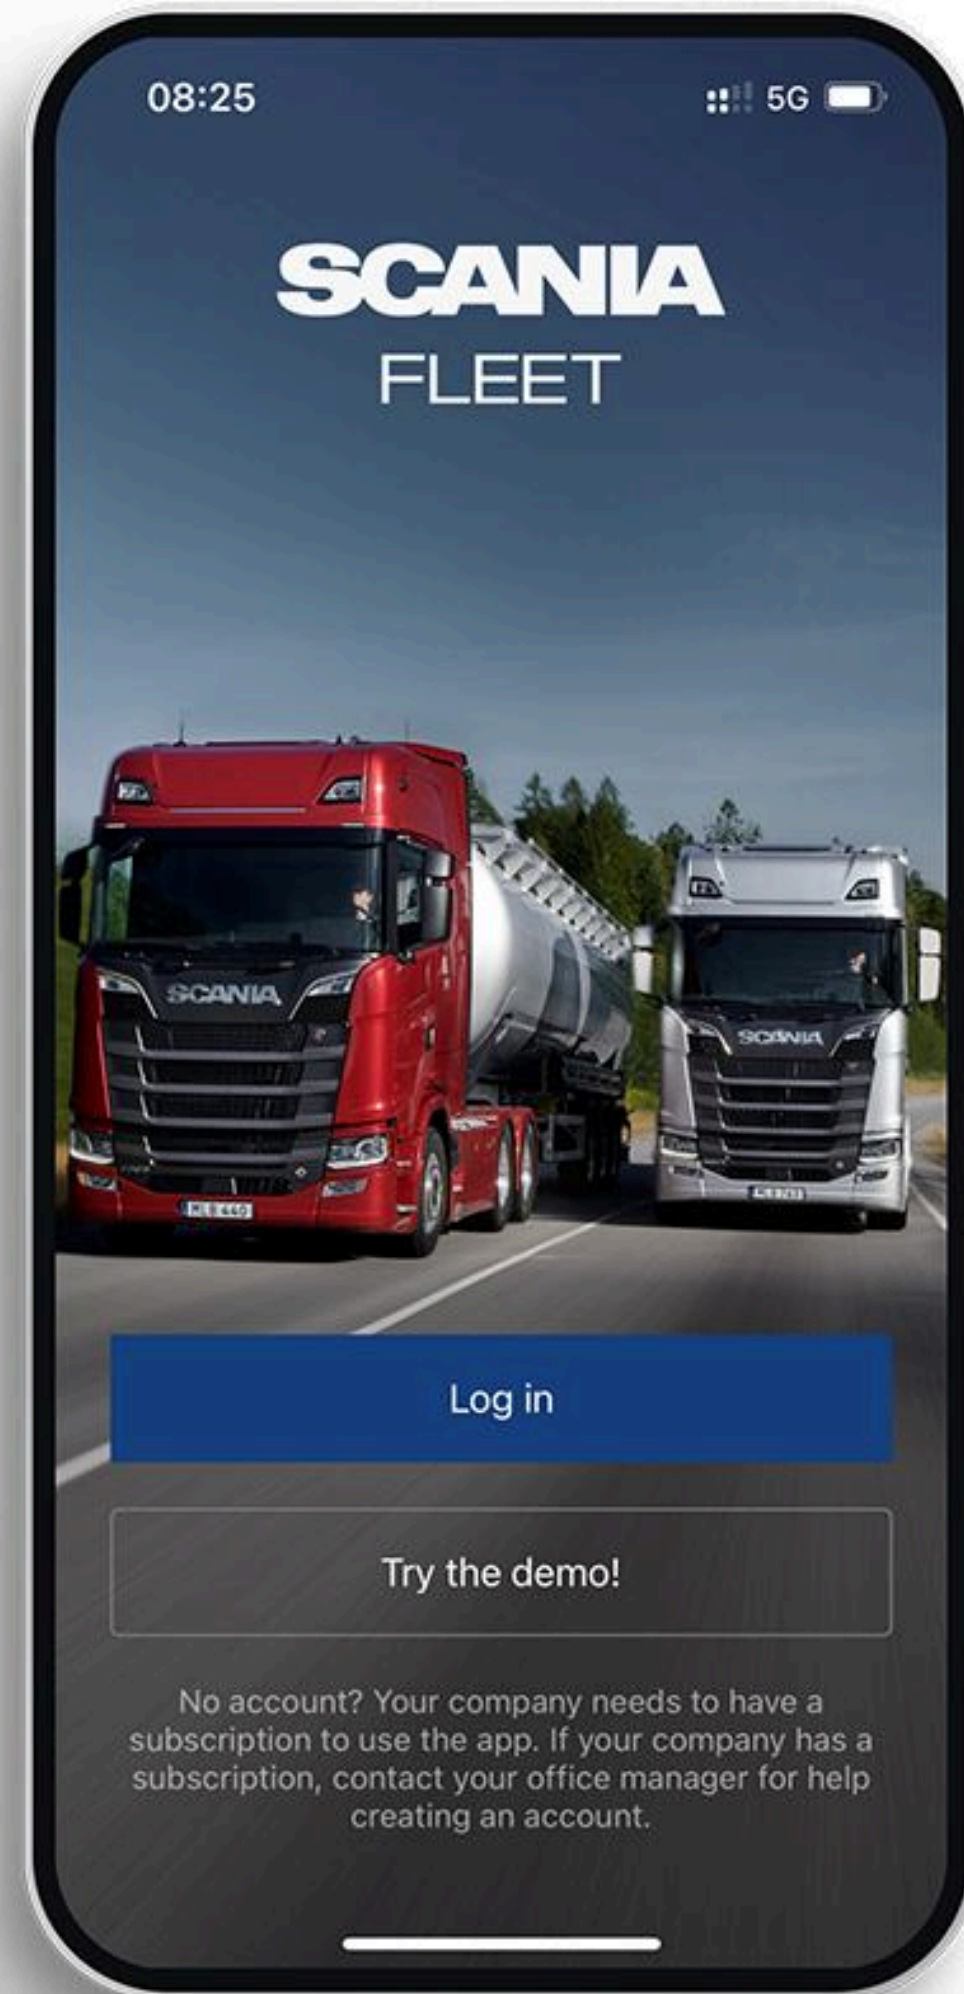

# OUR DIGITAL ECOSYSTEM

My Scania is a digital platform designed to make everyday operations easier and more profitable. Manage your vehicles, monitor performance and access services all in one place.

## What's in it for you?

- Maximum performance and uptime
- Charging tailored to your routes
- Best total operating economy and control over energy costs
- Smart charging and battery conditioning for extended battery lifespan
- End-to-end support: from analysis to installation

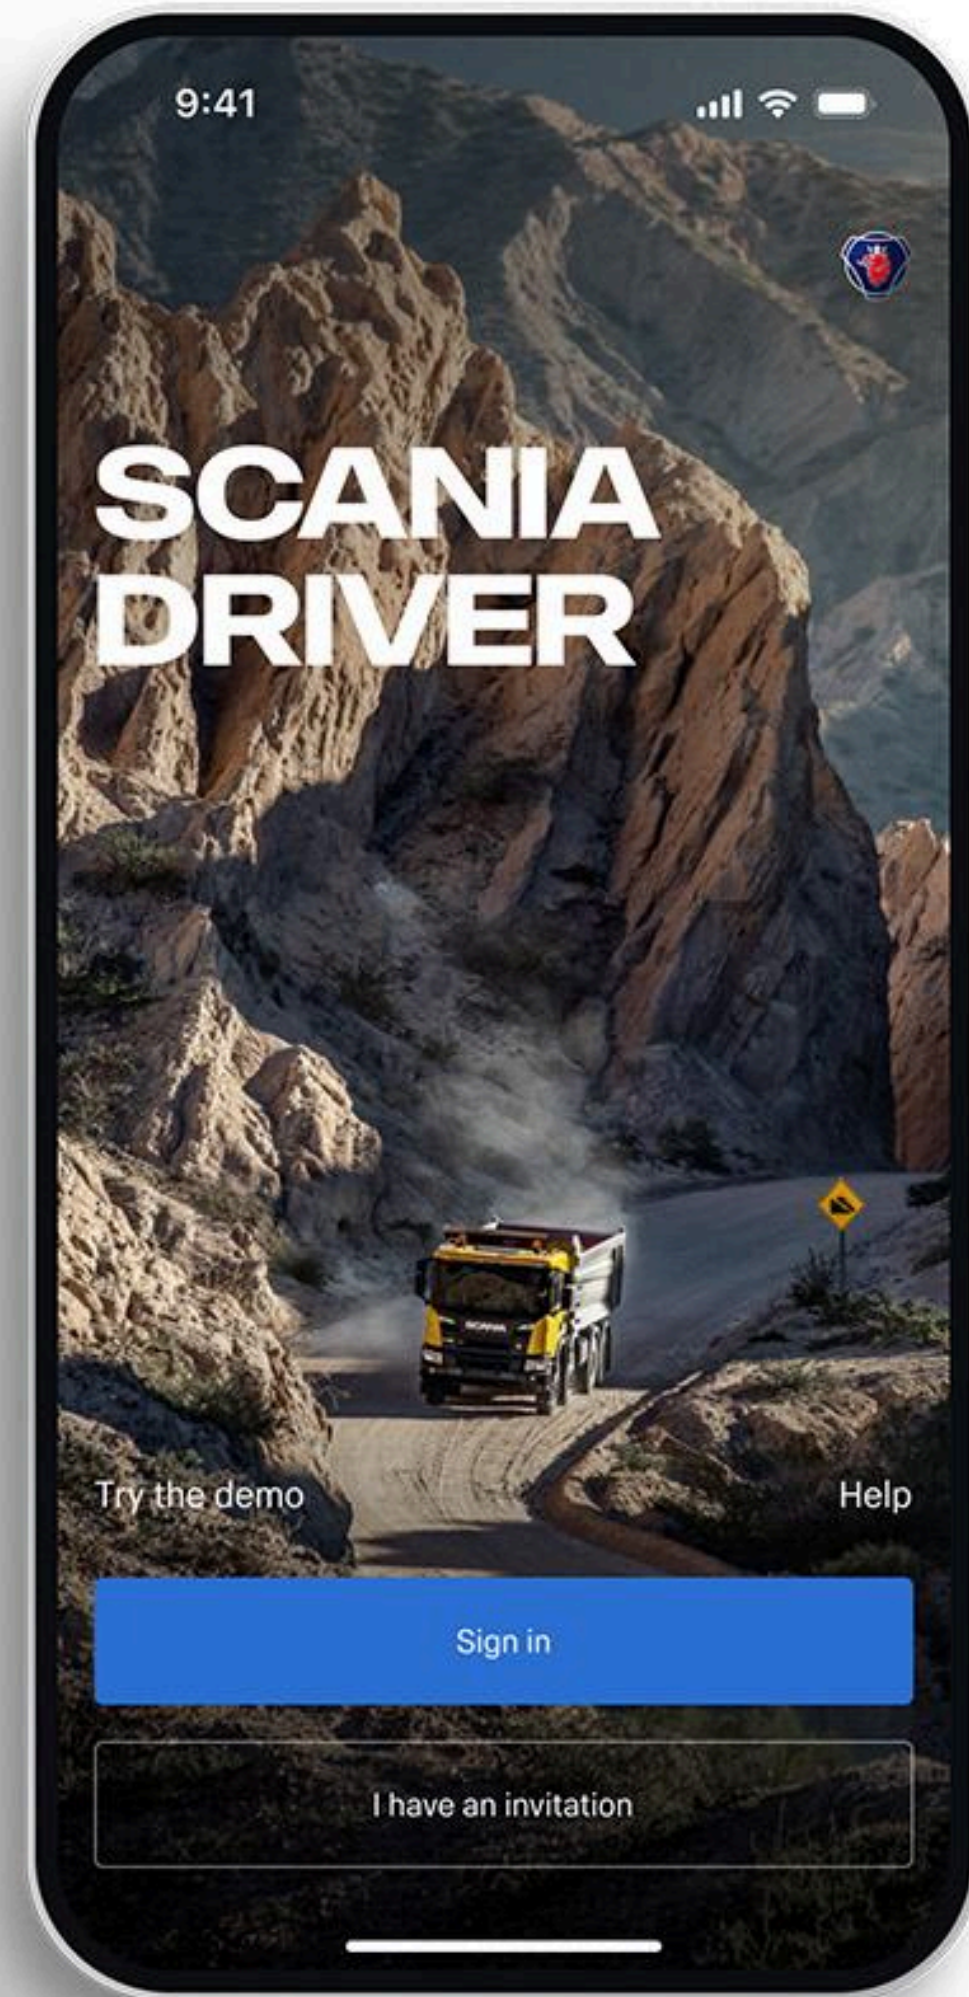

## SCANIA FLEET APP

# YOUR FLEET ON THE GO

A mobile tool for instant access to vehicle status, driver performance, service planning and energy consumption data – helping you improve operational efficiency. Available for both iOS and Android.

- Real-time vehicle positioning and key vehicle data
- Monitor driver performance as well as driving and rest times
- Keep track of your fleet's service bookings
- View reported defects for faster action
- Access your My Scania contacts from your phone

## SCANIA DRIVER APP

# SUPPORTING DRIVERS WHEREVER THEY ARE

The Scania Driver app connects drivers to the My Scania digital ecosystem – making daily tasks easier and integrating relevant fleet services.

- Features include Check Before Drive, remote heater control and service planning
- Digital handling of problems or defects
- Overview of driving and rest times
- Performance feedback to improve efficiency and range
- 24/7 access to Scania Assistance

## SCANIA DATA ACCESS

# VEHICLE DATA – THE WAY YOU WANT IT

Scania Data Access gives you structured, high-quality data directly from the source. Connectivity comes in-built with your Scania vehicle and our API modules can be integrated into your relevant systems. Activate or deactivate it anytime from your office chair, making even short-term data sharing possible. No retrofits, no downtime - just seamless access to the data you need.

### Main benefits

- No costly retrofitting and associated workshop downtime
- Easy to track rented Scania trucks for limited time periods
- Improved fleet efficiency and tracking

## SCANIA DEVELOPER PORTAL

# UNLOCK THE VALUE OF YOUR DATA

You can integrate our Scania APIs with your own ideas – to develop the best, innovative solutions for your business.

- Build smarter workflows, automate reporting and develop tailored solutions to meet the needs of your operations
- Integrate Scania data directly into your business systems

OPERATIONS

# CONTROL PACKAGE

Scania Control Package offers digital services to help you manage your fleet, increase productivity, monitor driver performance and track your climate footprint.

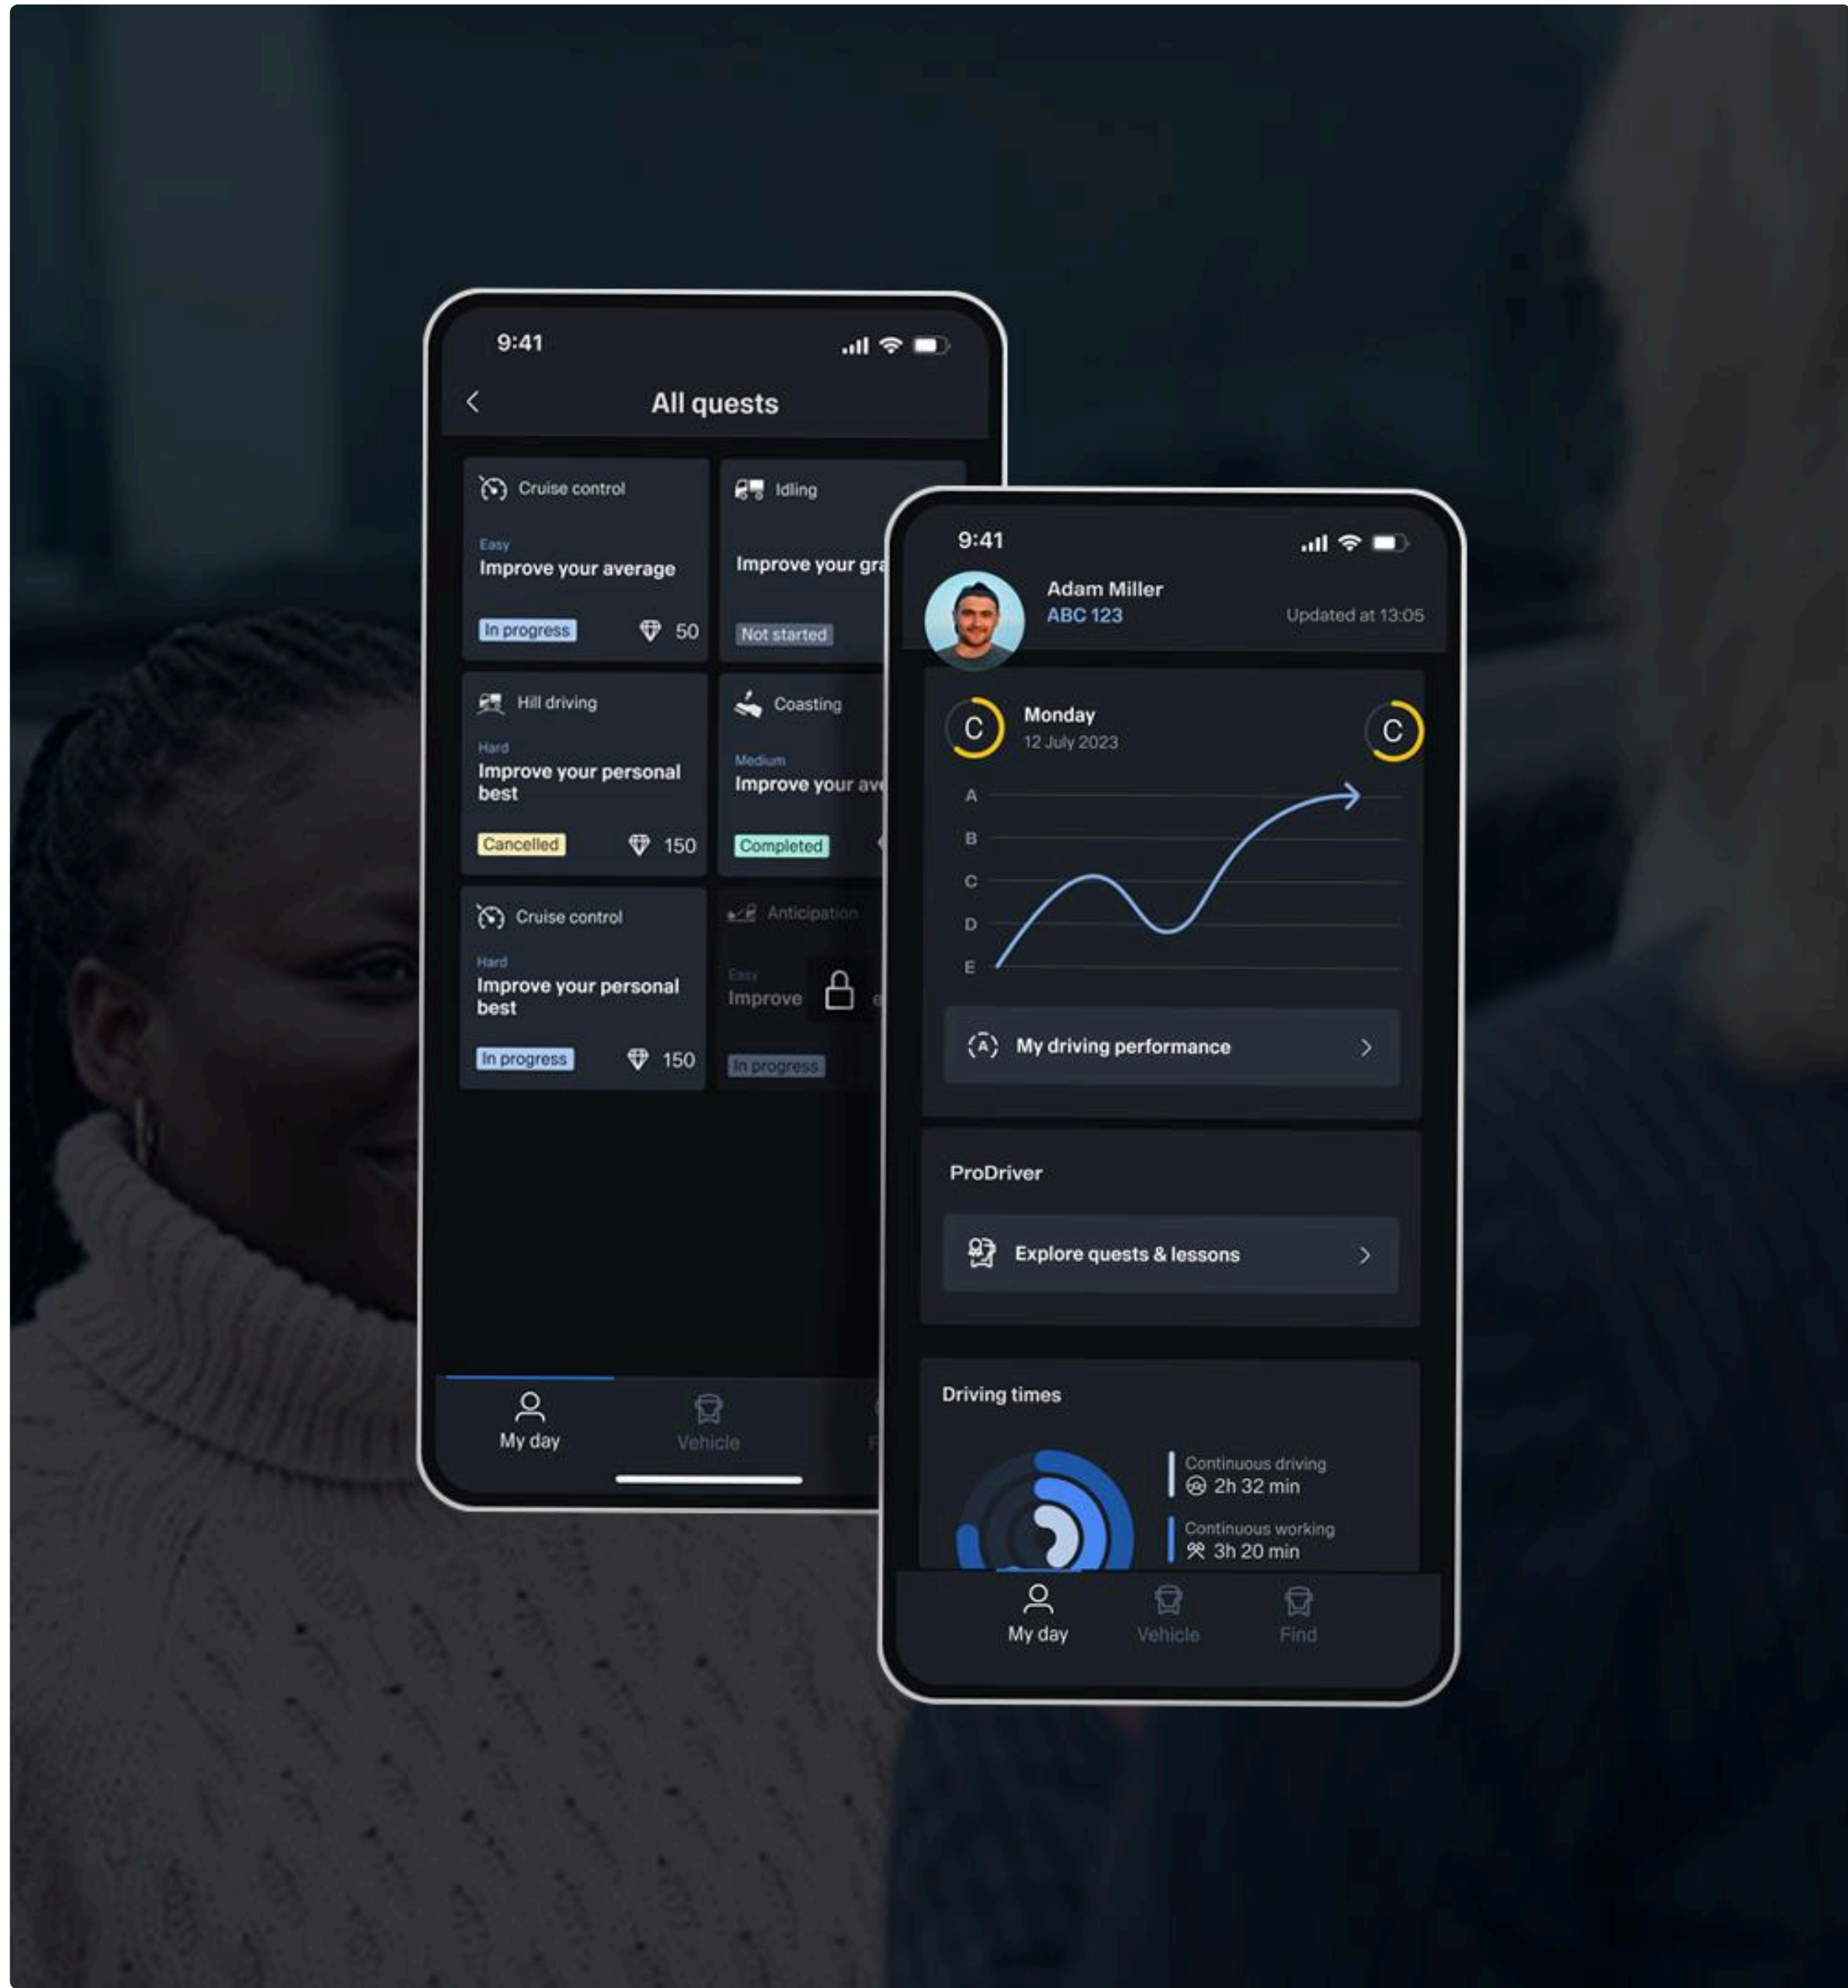

It includes these services:

Monitoring report	Vehicle performance	Scania Zone
Service planning	Charging services (Battery Electric Vehicles)	Data access
Fleet position	Driver evaluation	Check before drive

## MAIN BENEFITS

- Improves fuel and energy efficiency
- Reduces the risk of accidents and vehicle wear and tear
- Improves safety through controlled speed zones
- Can help track vehicle positions at key locations
- Gives insight into each vehicle's emissions

SCANIA PRODRIVER

# FOR MORE SUSTAINABLE DRIVING

Scania ProDriver is a digital coaching service that helps drivers improve their driving skills, reduce fuel consumption and emissions, and build long-term sustainable driving habits. It builds on the driving data and grades provided by Driver Evaluation – turning insights into action through lessons and quests.

Drivers learn at their own pace and fleet managers can follow progress and give support. Drivers can access Scania ProDriver and Driver Evaluation in the Scania Driver app and office staff can access it via My Scania.

**Main benefits**

- Reduced fuel costs and lower emissions
- Engaging way to increase driver knowledge and skills
- Less wear and tear and reduced repair and maintenance
- Cost-efficient and less time consuming – meaning more uptime

## SCANIA TACHOGRAPH SERVICES

# HELPING YOU STAY COMPLIANT

Scania Tachograph Services give you clear insights into driver activity and vehicle usage, with smart features like reminders, reports and infringement handling. All designed to help you maximise uptime and stay compliant with laws and regulations.

### Main benefits

- Makes compliance easy – helps you meet EU laws and regulations.
- Proactive infringement management to minimise costly fines.
- Secure storage and automatic data collection saves time – and admin.

## CHARGING SOLUTIONS

## FULL CONTROL OF YOUR FLEET'S CHARGING

Scania Charging Services help you plan, monitor and optimise the charging of your electric fleet, making sure your trucks are ready when you need them.

### Main benefits

- Complete visibility of charging status and vehicle readiness
- Real-time monitoring of state of charge, range and charging progress
- Ensure vehicles are charged and preconditioned before departure
- Instant notifications in case of charging interruptions
- Analysis of charging history to optimise energy use and reduce costs

ELECTRIC

SCANIA CHARGING ACCESS

# KEEP YOUR FLEET MOVING

Scania Charging Access is an easy way to connect to a growing network of public charging stations for heavy-duty vehicles, fully integrated into the Scania digital ecosystem.

**Predictable pricing**

Transparent, fixed rates per country – clear costs and no surprises. Free signup and no monthly fees make this a perfect backup even if public charging is not a part of your daily operations.

**Easy for fleet managers and drivers**

On the road or in the office – charging is simple. Drivers can charge quickly with the Scania Driver app and a charging card while fleet managers monitor, plan and pay via My Scania.

**Mixed fleet charging**

Works seamlessly for mixed-brand fleets.

**One clear invoice**

One simple invoice every month – no matter how many charging cards or vehicles you have.

## FINANCIAL SOLUTIONS

Whether you are renewing your fleet, expanding operations or buying electric trucks, Scania's tailored financial and insurance solutions are designed to meet your unique needs.

- Predictable monthly costs
- Reduced financial risk
- Aligned with your cash flow
- Premium consultation services for both combustion engine and electric vehicles
- Peace of mind with a partner who understands your business

# KEY TAKEAWAYS

- One connected ecosystem for vehicles, drivers and services
- Optimised total cost of ownership
- Increased uptime and lower costs
- Full visibility and control of fleet performance and charging
- Safer urban operations through integrated safety solutions
- Flexible solutions tailored to meet your operational needs
