# THIS IS SCANIA ZONE

Scania Zone is a position-based system for real-time vehicle adjustments in pre-defined zones. It allows you to set conditions for the vehicles connected.

A connected vehicle with a Scania Zone subscription can be managed from your office through the Scania Fleet Management Portal.

Scania Zone contributes to a safer, cleaner and more quiet city by letting you easily set restrictions for your vehicles.

# IT BENEFITS YOU

For you as an operator, Scania Zone supports:

## **SAFETY**

Monitor speed of your fleet in sensitive areas like construction zones, transport terminals and bus depots by off-board setting of speed conditions.

## **FUEL SAVINGS**

Reduce fuel consumption by lowering speed in defined speed zones.

## **GOOD WORK ENVIRONMENT**

Pre-set zone restrictions ensure safer and less stressful work environment for your drivers.

## **COMPLIANCE**

Meet requirements of Zone Management functionality set by Public Transport Authorities in tender business.

# REPORTING FUNCTIONALITY

By connectivity, the vehicle recognizes when it enters a zone and adapts to set restrictions.

If there is a violation to zone restrictions, an indication is sent to the Fleet Management Portal and via e-mail to the operator.

The reporting tool allows the operator to easily follow-up on deviations of zone restrictions, whether driver- or vehicle related. The reported data is available in flexible format.

# SCANIA ZONE

## GEOGRAPHICAL ZONES CAN BE:

- Informative – the driver gets an indication in the dashboard when entering/leaving a zone.
- Auto-compliant – the vehicle adjusts automatically to meet the set restrictions.

The driver may always override the automatic adjustments.

## PREREQUISITES:

To be able to benefit from Scania Zone, you will need:

- A connected compatible Scania vehicle.\*
