

GRAND TOURING

THE PURE SCANIA EXPERIENCE.

SCANIA

DESIGNED FOR GLOBAL MARKETS, REFINED FOR AUSTRALIAN CONDITIONS.

The new Scania Touring provides a pure Scania experience from bumper-to-bumper. Proven running gear, consistent build quality, low operating costs. 9m³ of underfloor luggage space, more passenger comfort, and more corporate style. Stock on hand for rapid order-to-delivery timing. And with one point of contact for all your needs, the Scania Touring delivers peace-of-mind.

DELIVERING INSIDE AND OUT

A privilege to own

Combining fuel efficiency and uptime with our 100% commitment to quality, Scania Touring offers you excellent total operating economy backed by our unrivalled levels of service and support. Wherever your vehicle travels, you can rest assured that Scania is always just a phone call away. With its distinctive styling, Scania Touring is the smart choice for your occasional as well as regular long-distance operations. Make an investment that makes a statement.

A pleasure to drive

Keeping drivers happy ensures passenger enjoyment for passengers. Scania Touring offers a well-designed ergonomic dashboard. Dashboard buttons and controls are placed and every detail fits into a functioning whole. The high steering wheel, together with the pedals, helps the driver to find the optimal driving position, making driving safer and more comfortable. The driveline features all Scania's latest technology. Scania Opticruise automatic gear for pleasant, economical driving.

nical travel.

Your passengers will appreciate the Scania Touring's smart, contemporary and practical design, which improves journey comfort and safety. Above all the coach is very quiet inside, thanks to an efficient aerodynamic exterior package and good drivetrain isolation. Large windows give an unimpeded outward view. A range of Australian-made seating may be specified, plus an onboard entertainment system helps the journey pass more quickly. The latest Scania active safety features are standard or available as options.

A SCANIA FROM BUMPER-TO-BUMPER

Affordable quality in a vehicle designed to meet multiple demands, in urban and regional settings, on daily school and charter trips or longer-distance touring, with expanded luggage capacity. Imported fully built-up and ready-to-roll, refined by Scania for Australian conditions, and engineered to provide years of reliable, durable and comfortable service; the new Scania Touring is ready to serve.

Quality Build

The Scania chassis and powertrain delivered from Europe is mated with a high quality, mass produced body at a modern, technology-rich, dedicated production facility in China, under the watchful gaze of Scania's own quality assurance teams. All components are supported by the Scania service network in Australia.

Quality Powertrain

The Scania powertrain is identical to that offered in Scania's existing Australian range, using either our frugal and reliable 5-cylinder 9-litre SCR engine or our more powerful 6-cylinder 13-litre SCR unit. There are Euro 5 and Euro 6 compliant options, and Scania Opticruise automated two-pedal or ZF automatic transmission options, both equipped with retarders.

Quality Design

The distinctive Scania style with darkened glazing and a matte black grille forming the dynamic T, so familiar in Europe, makes its debut in Australia. Xenon headlamps enhance the European look. LED daytime running lights and LED tail lights plus aluminium wheels complete the premium exterior look. A full 9 m³ of underfloor luggage space accessible via six easy-lift doors.

Quality Interior

Available fully fitted ex-factory or imported empty so you can select your own choice of Australian-produced seating, the Touring caters to all needs: cloth or leather, and up to 57-seats plus the driver. The main saloon's air conditioner is supported by a specific unit for the driver, which helps to reduce fuel burn when traveling empty.

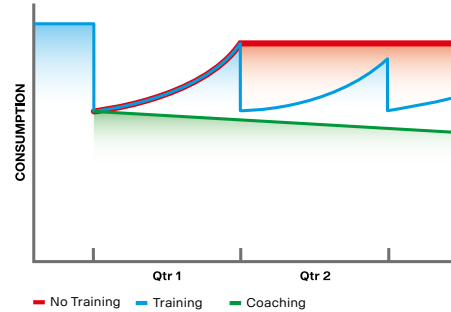

Quality Safety

The Scania Touring provides leading-edge safety systems. It passed the European rollover standard tests with flying colours and comes standard with anti-lock brakes, electronic brake system and electronic stability control. On Opticruise transmission models Adaptive Cruise Control is available.

Optimise Fuel Improvements

SCANIA DRIVER TRAINING

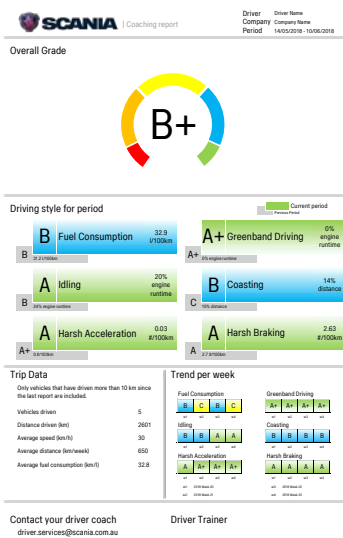

- Reduce consumption by up to 10%
- Effect decreases over time

SCANIA DRIVER SUPPORT

- Instant in-vehicle feed-back during driving

SCANIA DRIVER COACHING

- Analysis and coaching for continuous improvements
- Monthly reports to drivers and owners

TOTAL SUPPORT

You're not just buying a vehicle, but also gaining access to Scania's industry-leading support services that do far more than just keep your buses running. Scania's Total Transport Solution concept helps to enhance your Total Operating Economy, leading to greater profitability.

Your most valuable asset

Driver comfort is critical for safety. Ergonomic control layout, adjustable driving position, unique air conditioner, all add up to the best seat in the house. Which means the best ride possible for your passengers.

Driving skills that improve your bottom line

Your drivers can really help you drive down operating costs and CO₂ emissions. You just need to give them a little help to do it. That's why we have developed a number of services that focus on making driving easier.

Scania Driver Training

Even the most experienced drivers can improve. That's why we offer your drivers Scania driver training to show them how to get the best possible efficiency from your asset. It's not just about fuel burn reduction, but enhancing safety and smoothness to reduce wear and tear and increase passenger comfort. And Scania's Follow-up Coaching concept helps drivers maintain their edge.

Scania Driver Support

The onboard driver trainer installed in the digital dashboard constantly relays driving tips and awards drivers a star rating for their smoothness, anticipation and safety. Feedback is in real time and their efficiency score at the end of the journey indicates exactly how well they have been driving. This allows you to set targets formally or informally.

Scania Fleet Management

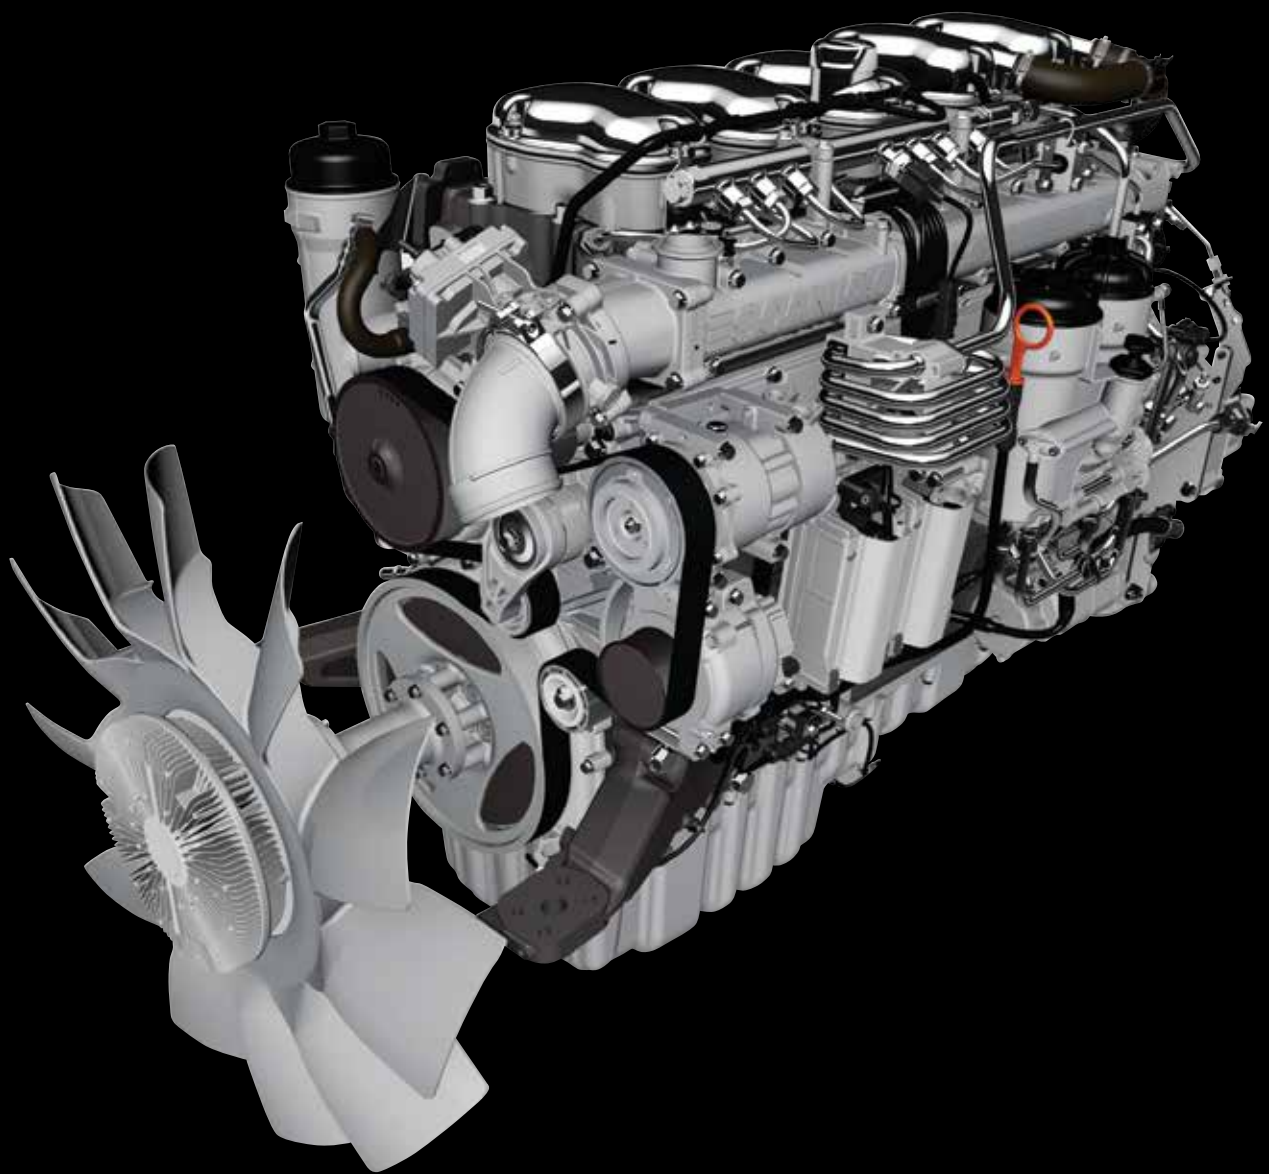

By connecting your fleet to your office, you can monitor vehicle location, performance and fuel consumption. You can also receive reports if something is wrong, so you can schedule a service break rather than being taken by surprise. It lets you fine-tune your operation and maximise uptime.

Help clear the air

To help you minimise CO₂ emissions, we work with you to understand your business and operating environment. We then provide the right fuel choices, technologies and services to: optimise your efficiency, maximise your profitability, and minimise your environment impact.

Services and Maintenance

With our focus on total operating economy, we will support you with our one-stop concept for maintenance and repairs. Our nine Scania-owned branches in major cities are backed by 46-independently-owned, authorised Scania dealers around Australia, staffed by Scania's factory-trained technicians. Our modular powertrain concept ensures a high level of mechanical expertise across the continent, where ever you are based or travel.

SPECIFICATIONS

Length	12.30 m	Brakes & Safety equipment	ABS anti-lock brakes
