TIP 5 Protect your Scania Residual Value	Scania Genuine Parts with one year warranty	Fixed Price Repair with Scania Approved Technicians (see page 4 for more details)	Operating Lease with Scania Finance

FIXED PRICE REPAIR

INCLUDES 2 YEAR WARRANTY

No need to fear the invoice

When you choose one of Scania Australia's factory-owned branches (or participating Authorised Dealers) to undertake a repair on your Scania P, G or R-series truck, we can give you a guaranteed fixed price upfront for the repair and as a result you receive significant savings.

No ifs. No buts.

Quite simply, our Scania fixed price repairs include the cost of all parts, labour and consumables.

Plus you receive a 2 year Unlimited parts and labour warranty, when fitted by a Scania Branch or participating Authorised Dealer. And the invoice you receive will match the quotation exactly – so there won't be any unpleasant surprises. How does that sound?

We have worked out our prices using our global expertise, leveraging the benefit of more than 1600 workshops worldwide who are experts at keeping Scania trucks on the road.

We know exactly how long a repair should take to carry out. And if it takes a bit longer, we bear the additional cost – not you.

Some repairs involve "related parts" that should be changed at the same time, and these are always included in the fixed price.

And if during a repair we discover another procedure that should be carried out, we will give you a fixed price for that too, before we carry out the work.

Give us call and we'll give you a quote you won't find anywhere else.

WHAT IS SERVICE EXCHANGE?

Sometimes it is uneconomical to replace worn parts with brand new ones, especially in older vehicles, while trying to repair a broken part can take an unnecessarily long time at the workshop. That's why the Scania Service Exchange range is a cost effective way to quickly get the vehicle back on the road.

The Scania Service Exchange range gives access to a wide range of remanufactured components at competitive prices. The range maintains the same high quality as brand new spare parts and is covered by the same warranties, which creates a sense of security for you.

Service Exchange parts have the following qualities:

- They contribute to reduced environmental impact.
- Remanufactured parts fulfil the same function as new parts.
- They are remanufactured using standardised industrial processes in accordance with the technical specifications

WHAT IS SCANIA MAINTENANCE WITH FLEXIBLE PLANS

- Increased Profitability**
- Maximise your Uptime**
- Tailored plan via Operating Data**
- Servicing when required**

Instead of service intervals based on set kilometres, and standard predefined service sheets, with Scania Maintenance with Flexible Plans, vehicles are called in for service when the operating data indicates that maintenance is needed. This means the vehicle receives exactly the maintenance it needs and, in most cases, delivers increased uptime by spending less time at the workshop.

This new technology continuously monitors the vehicle's operating data which makes it possible to determine with a great deal of precision when various maintenance operations need to be carried out. A Scania service agreement including flexible maintenance plans means that the operator does not have to keep track of when the vehicle needs to be serviced; instead he or she is contacted by Scania when it is time for a tailored service and how long the vehicle will be needed.

No business is quite like the other. Different routes, driving styles and environments all affect the wear and tear on your vehicles. Using real-time vehicle data, we tailor maintenance plans that ensure downtime only when a vehicle needs service, and at a convenient time for your business. This maximises your productivity and reduces any disruption to the normal running of your business.

With a service plan that is updated on a weekly basis and sent to the vehicle, Fleet Management Portal and all Scania workshops, you can rest assured that maintenance is always up to date – even when the conditions change.

PREVENTATIVE MAINTENANCE TIPS

At Scania, we understand the importance of keeping your truck on the road and minimising the time it spends in the workshop. Therefore we always review our preventative maintenance recommendations to achieve the best outcome for you. Scania understands that unscheduled maintenance and repairs add unwanted costs to operators. Scania has produced a list of some of the items we suggest be replaced or serviced as part of a preventative maintenance program that will maximise your fleet availability. Unit Injectors are one such item.

Scania unit injectors are designed to provide the best possible performance and reliability, with the lowest possible fuel consumption and environmental impact.

The unit injector has a great influence on engine output, torque and fuel consumption. The function of the unit injector is to supply the combustion chamber with the right amount of fuel at the right pressure. The diffuser nozzles differ from unit injector to unit injector. They often differ in terms of materials and heat treatment. The wrong unit injectors can result in the engine not delivering the promised performance.

Scania unit injectors have an **optimised service life** by using the right surface treatment and thickness for the piston in the unit injector.

The unit injector has been developed to provide the **lowest possible fuel consumption**, which results in improved operating economy as well as reduced environmental impact.

Injectors - Recommended Preventative Maintenance

Long Distance > 68 Tonnes 600,000km (9000hrs)	Service or replace
Long Distance 68-130 Tonnes 500,000km (7000hrs)	Service or replace
Construction / Distribution 500,000km (7000hrs)	Service or replace

The full Preventative Maintenance guide for Scania Trucks and Buses are available at your Scania Branch or for download at Scania.com.au

Exchange Injectors are included in the Scania Service Exchange system, which means that reconditioned injectors are available as an alternative to newly manufactured ones. Exchange injectors are always supplied with new nozzles and meet the same strict quality requirements and warranties as new injectors

2015 PRICES IN 2019

Scania's Genuine replacement parts are more affordable than you think. In fact, we have not increased the majority of our parts prices since 2015, so they are actually even better value now than they were four years ago.*

Scania recommends using only genuine replacement parts to keep your Scania truck or bus as reliable as possible, and also reduce the potential for a breakdown. When you are off the road, you can't service your customers so the true impact of a non-genuine part can be very costly to your business. All Scania Genuine Parts have been engineered and manufactured to Scania specification, to ensure they work perfectly every time you turn the key.

Year-after-year Scania provides you with complete peace-of-mind that the parts you buy from us are not only up-to-the-job, but also priced competitively, saving you time and getting you back to work as quickly and simply as possible.

* Parts pricing in the Scania Parts Solutions brochure have not increased since 2015.

Scania Genuine Parts Terms and Conditions

Our goods come with guarantees that cannot be excluded under the Australian Consumer Law. You are entitled to a replacement or refund for a major failure. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure. Subject to any such non-excludable rights and this express Warranty, all other terms, warranties, conditions, representations and undertakings (express or implied) which may lawfully be negated, excluded, modified, limited or restricted from and in relation to the sale of your Scania part/s are hereby to the extent permitted by law (but not otherwise) negated, excluded, modified, and restricted and the Company's liability shall, whenever permitted by law, be limited to the repair or replacement of any defective or faulty part or the payment of the cost of any such repair or replacement as the Company in its sole discretion determines to be appropriate. Scania Australia Pty Ltd (the Company) warrants that each new Scania Spare Part sold by it or any of its Branches or Authorised Distributors/Dealers to be free from defects in material and workmanship under normal use and service, its obligation under this warranty being limited to repairing or replacing, as hereinafter provided, at its option, at the Company's Branch or Authorised Distributors/Dealers discretion any part or parts found to the Company's satisfaction to be defective upon examination by it.

* Fixed Price Repairs Terms and Conditions

1. Scania Australia standard terms and conditions of sale apply. These are available online at www.scania.com.au 2. Applies to Retail sales only. 3. Available at participating branches and dealers only. 4. Fitted prices include inspection, diagnosis, verbal assessment, Scania approved parts, labour and consumables. 5. All prices include GST. 6. The published prices apply to the job shown (part numbers & RTS codes) and do not apply to other similar products available from Scania. 7. The Fitted Price Repair special offer pricing cannot be used in conjunction with any other discount or promotion. 8. Fixed Price Repair pricing is part of a promotional offer, which can be withdrawn at any time. In the event Scania Australia chooses to withdraw the promotion, then notice will be issued via the website: www.scania.com.au. This would not affect any pre-existing or accepted work agreed to by Scania Australia for the duration of the promotion. 9. Scania Australia may in the future alter any terms of this promotion without notice and in the event Scania Australia chooses to alter the terms of this promotion, then notice will be issued via the website: www.scania.com.au. This would not affect any pre-existing or accepted work agreed to by Scania Australia for the duration of the promotion. 10. All prices assume presentation of the vehicle, by the customer, to the repairing workshop. 11. Additional breakdown related charges will apply if the vehicle has suffered an involuntary stop at the roadside. 12. The Fixed Price Repairs published are created using Scania's standard times based on standard Scania vehicle specifications and do not include any additional labour required for the removal of catwalks, ancillary equipment, bodywork, superstructures or any non-standard equipment fitted to the vehicle. Additional time required to complete the job in respect of these items will be agreed with the customer prior to any work being carried out. 13. Mineral oils are used in all circumstances. Fixed Price Repairs do not include semi synthetic or fully synthetic oils. If these oils are required the difference in price between mineral oil and the semi synthetic or fully synthetic oils will be charged. 14. All information is believed to be correct at the time of going to press, however, Scania reserve the right to introduce at any time modifications of changes to the jobs and or programme as part of a policy of continuous improvement.

PLEASE NOTE: Refundable core fees will be charged at the time of product purchase and will show as a separate line item on your invoice. Core fee credit will be applied to the customer account or invoice when cores are received subject to the following conditions: Cores must be complete, fully assembled, drained of fluids and in rebuildable condition and chassis number and mileage information must also be provided. Burnt products or any cores that are broken damaged or destroyed by incorrect use, dismantling, handling or transportation will not be accepted. Prices within the promotion include GST and conclude end of January 31, 2020, or while stocks last. Images in this brochure are for display purposes only and may not represent actual products. Offers available from your authorised Scania branch or participating dealers. Prices and specifications were correct at the time of printing and are subject to change without notice. For a full list of Scania terms and conditions please go to scania.com.au. RTA # AU07116.
