

INTRODUCING THE NEW SCANIA V8 RANGE

**WHEN EMOTION
MEETS LOGIC**

SCANIA

Updated with a unique dark grey V8 grille and a new chromed front roof trim.

CREATING IMAGE WITH STYLE

When you drive a Scania V8, you are driving a premium truck with a premium engine. And that should be visible too. It's part of the unique driving experience that only a V8 can create. Where a driver with high demands not only gets built-in quality and outstanding power, but also a distinctive way of expressing it.

The Scania V8 770hp offers an exclusive V8 styling package. Where both the exterior and interior have various design features and options. Including the V8 truck in its characteristic red colour.

It gives you the opportunity to make a personal statement. Just the way you want it.

THE LEADER IN SUSTAINABLE TRANSPORT

The world urgently needs to break the link between increasing demand for transport and increasing carbon emissions, noise, congestion and road accidents.

The new Scania 770 has improved energy efficiency with lower fuel consumption. This translates to lower emissions per transported ton.

All of our Euro 6 engines in the V8 range can run on renewable HVO fuel and Biodiesel.

Driving a Scania V8 has always been a reason for pride and the starting point for an experience filled with emotions. But the V8 engine is so much more than just a feeling. It's a logically superior decision that makes sense for your business as a whole.

The new Scania 770 is two pieces of a puzzle, perfectly matched. Where amazing driveability co-exists with outstanding performance and fuel efficiency. And where the legendary engine sound reveals incomparable power and robustness.

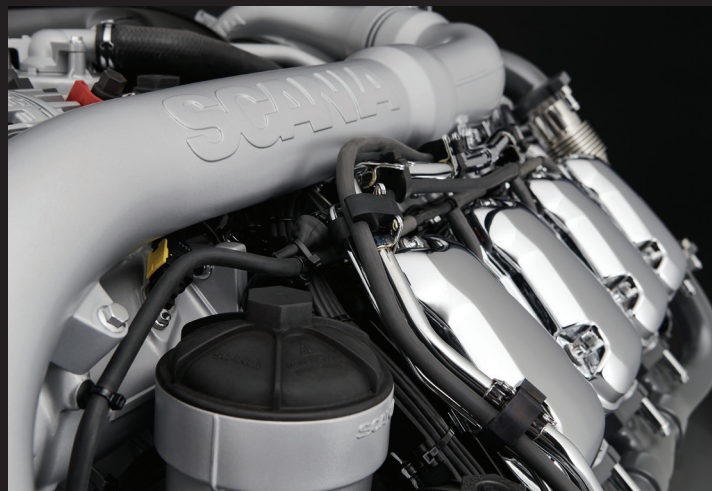

This is our way of proving that you can have it both ways. That it's possible to get an incredible driving experience that also drives your business.

Because the new Scania 770 is where emotion meets logic.

FOR THE HEAVIEST LOADS & TOUGHEST ROADS

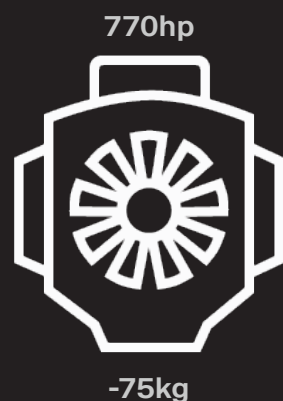

There are many components that have been updated and optimised in the Scania 770:

- New exhaust gas aftertreatment concept with twin dosing
- New high pressure fuel pump
- New engine management system
- Optimised 180A alternator
- Increased compression ratio
- Increased peak cylinder pressure
- Reduced internal friction
- Fixed geometry turbo
- Single bank exhaust manifold
- Dis-engageable air compressor
- Variable steering pump
- Ball bearing turbo charger
- Rocker covers with V8 styling

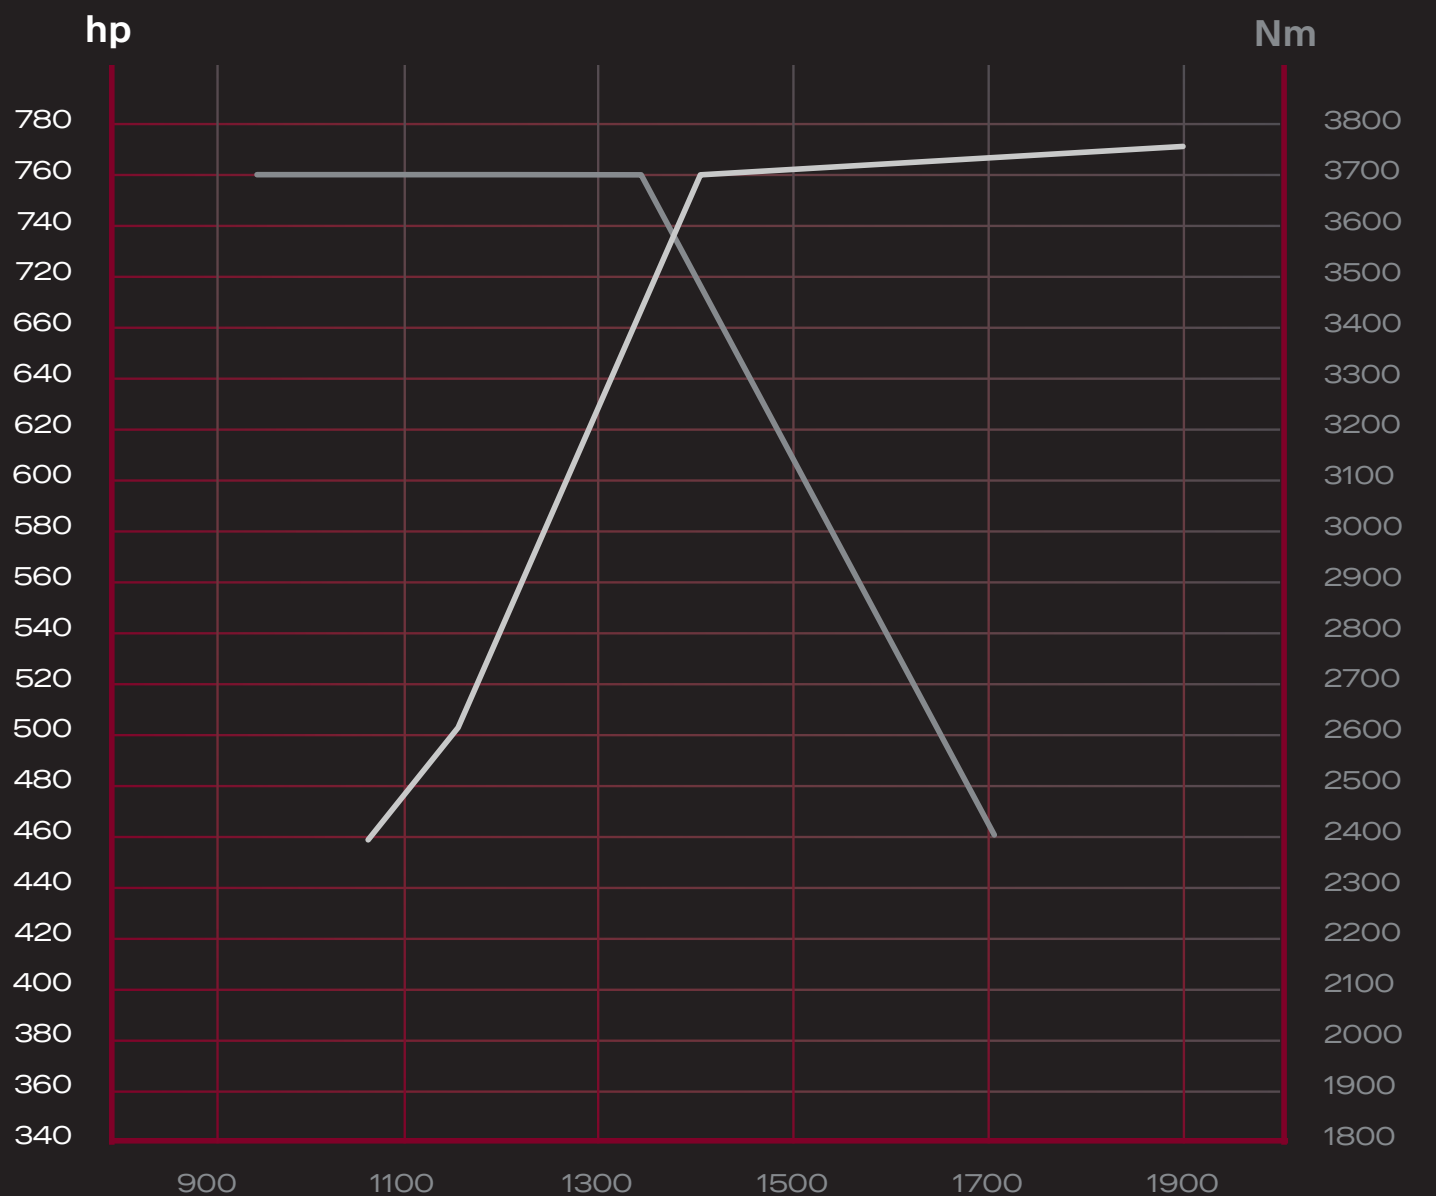

Lower weight - More Load

When adding more power and torque to the 770 we have been able to reduce the weight by 75kg. The weight reductions will benefit payload and energy efficiency.

770

Cylinders: V8
Swept volume: 16,4 litres
Max. power: 770 hp (566 kW) at 1800 r/min
Max. torque: 3700 Nm at 1000-1450 r/min

Emission control: SCR
Turbo: FGT, water cooled ball bearing
Camshaft: Normal
Renewable fuel: HVO

The updated Scania 770 is characterised by impressive power, performance and productivity. It brings fuel efficiency to the next level and sets a new standard with high residual value and better uptime. We offer the widest selection of output levels on the market in the high power segment, with the possibility of using renewable fuels. Which makes it possible to enjoy the unique benefits of driving a V8 regardless of your operation.

For V8 lovers, 770 is the new magic number. But it's the torque that will get you up the hills. The 770 hp will give you a massive 3700 Nm (2730 lbft) of torque.

Scania V8 - Powerful engines with a sound out of the ordinary.
