

# ***Irizar i4***

 **Irizar**  
lighting the road

## *Solidity and growth*

Throughout the company's history, Irizar has always responded to clients' different needs, continuously improving the safety, reliability, comfort and profitability of its products, and offering clients the best service possible - for more than 125 years.

Today it is a world-leading business in the road passenger transport sector, and has a growing presence in the electronics, communications and rotating electrical machinery sectors. It is a global company with over 2,500 employees, production

plants in five countries, a sales presence in more than 90 countries across five continents and its own industry leading research and development technology centre.

Irizar continues to grow, diversify and look to the future - a future where technology, electronics, telecommunications, innovation, environmental and social sustainability, diversity and mobility develop and improve in close co-operation with its employees, clients and partners.

## *A focus on safety*

The safety of everyone who travels in our coaches is Irizar's top priority.

That is the reason why the company invests heavily and collaborates with the most prestigious engineering companies in order to identify and integrate the most advanced safety technologies and anticipate and exceed future regulations, for both drivers and passengers.

## *Brilliant reliability*

All Irizar coaches have been designed with absolute reliability in mind, making our range robust and dependable for all operators.

Irizar incorporates the most advanced production components and materials in its vehicles. With major use of automation and customisation in the manufacturing process, its new coaches have been subjected to the most demanding tests the passenger transport industry can devise, from independent institutes and engineering firms of recognised prestige, with peerless performance and results.

## *Service: the Irizar difference 24h/365d, 12 languages*

Service is a fundamental belief at Irizar and we work hard to build and develop our clients' trust.

Irizar's service is based on customised attention that begins when clients define and configure their coach according to their needs. And from then on our clients are backed up by an expert team who will accompany them throughout the entire life of the vehicle.

The Irizar brand is a service guarantee that offers clients a comprehensive service for repairs, tune-ups and maintenance with a full guarantee, as well as modern logistics centres that handle orders for replacements and the supply of all the necessary parts to anywhere in the world in the shortest time possible.

## *Client profitability*

Irizar's coaches allow operators to maximise profit based on minimizing fuel consumption, and making the vehicles simple and quick to maintain. We achieve this by designing our coaches with absolute attention to ensuring optimum aerodynamics and weight distribution, and providing maximum accessibility to parts to allow operators to keep their fleet on the roads in revenue earning service.

The image shows the interior of a modern bus. Rows of seats with dark blue fabric featuring a small, light blue geometric pattern are visible. The seats have grey plastic armrests. Above the seats are overhead storage compartments with white doors and integrated lighting. The bus floor is grey, and a yellow safety line is visible. The perspective is from the side of the aisle, looking towards the front of the vehicle.

*Irizar guarantees coverage  
and maximum resale value*

## *Innovation in movement*

The Irizar i4 has been especially created for urban and intercity routes.

It's an ideal bus for metropolitan, short-distance, school or company transportation.

It complies with the future R66.01 safety regulations and, of course, maintains all the standards for quality, comfort, reliability and safety that characterise the Irizar range.

# Maximum versatility

The i4 is characterised by its high adaptability to the needs of clients and users.

It is available in a wide array of lengths that range from 9,4m to 15m, as well as in various finishes and floor heights:
