

List of tested mobile phones compatible with Scania Radio Premium

The list is downloaded from www.scania.com/manuals

The listed phone models are tested for Bluetooth connection to Scania Radio Premium. In the tests, the results varied between different brands and models, and the list should be seen as a help in selecting a mobile phone model. The list is not complete for all phones on the market, but consists of a selection of phone models. If a phone model is not listed it may still work with the radio. Because the electronics of mobile phones is constantly changing, Scania cannot, despite the tests, ensure the tested features of the listed models.

- Feature works
- Feature partly works
- Feature does not work or isn't tested
- Feature is not available for this phone

Note that only the phonebook entries stored on the mobile phone's SIM card can be transferred to the radio. See the mobile phone's manual for instructions on where items are stored and how they can be copied or moved to the SIM card. Not all phones support this feature.

There are two different phone lists below, one for radios with software version **0711**, and one for **1208 & 1211**. If the truck has been updated manually, or has a chassis number at or above those in the following list, it has software version 1208. Otherwise it has 0711.

| | Chassi number |
|-------------------|---------------|
| Scania Södertälje | 2 110 797 |
| Scania Zwolle | 5 385 067 |
| Scania Angers | 9 196 430 |

2016-11-02

The following list contains phones supported by the latest software, **1208 & 1211**.

| | iPhone 6 | Samsung Galaxy S5 | Nokia Lumia 1520 | Google Nexus 5 | | | | | |
