The marine engines from Scania are based on a robust design with a strength optimised cylinder block containing wet cylinder liners that can easily be exchanged. Individual cylinder heads with 4 valves per cylinder promotes repairability and fuel economy. The engines are type approved in all major classification societies.

The engine is equipped with a Scania developed Engine Management System, EMS, in order to ensure the control of all aspects related to engine performance. The injection system is based on electronically controlled unit injectors that gives low exhaust emissions with good fuel economy and a high torque already at low revs. The engine can be fitted with many accessories such as air cleaners, PTOs, transmissions and type approved instrumentation in order to suit a variety of installations.

### Standard equipment
- Scania Engine Management System, EMS
- Unit injectors, PDE
- Turbocharger
- Fuel pre-filter with water separator
- Fuel filter
- Oil filter, full flow
- Centrifugal oil cleaner
- Oil cooler, integrated in block
- Oil filler, in engine block
- Oil dipstick, in block
- Starter, 2-pole 7.0 kW
- Alternator, 2-pole 100A
- Flywheel SAE 14
- Silumin flywheel housing, SAE 1 flange
- Front-mounted engine brackets
- Protection covers
- Closed crankcase ventilation
- Operator’s manual

### Optional equipment
- Hydraulic pump
- Side-mounted PTO
- Front-mounted PTO
- Exhaust connections
- Electrical base system
- Control and instrument panels
- Accelerator position sensor
- Engine heater
- Power pack engine bracket
- Stiff rubber suspension
- Air cleaner
- Studs in flywheel housing
- Reversible fuel filter
- Low coolant level reaction
- Variable idle speed setting
- Low and extra low oil sump
- Long oil dipstick
- Oil level sensor
- Bilge pump

*Including charge air

**IFN** – intermittent service: Intended for intermittent use where rated power is available 1 h/3 h. Accumulated load factor must not exceed 80% of rated power. Unlimited h/year service time.
DI13 073M. 368 kW (500 hp)
IMO Tier II, US Tier 2, EU Stage IIIA

Engine description

- No of cylinders: 6 in-line
- Working principle: 4-stroke
- Firing order: 1 - 5 - 3 - 6 - 2 - 4
- Displacement: 12.7 litres
- Bore x stroke: 130 x 160 mm
- Compression ratio: 16.3:1
- Weight: 1180 kg (excl oil and coolant)
- Piston speed at 1500 rpm: 8.0 m/s
- Piston speed at 1800 rpm: 9.6 m/s
- Camshaft: High position alloy steel
- Pistons: Steel pistons
- Connection rods: I-section press forgings of alloy steel
- Crankshaft: Alloy steel with hardened and polished bearing surfaces
- Oil capacity: 28-34 dm³ (standard oil sump)
- Electrical system: 2-pole 24V

Output

- kW
- hp

Torque

- Nm
- kpm

Spec fuel consumption

- g/kWh

Test conditions: Air temperature +25°C, Barometric pressure 100 kPa (750 mmHg), Humidity 30%. Diesel fuel acc. to ECE R 24 Annex 6. Density of fuel 0.840 kg/dm³. Viscosity of fuel 3.0 cSt at 40°C. Energy value 42700 kJ/kg.

Power test code: ISO 3046. Power and fuel values ±3%.
