

### Build your Scania:

1. Print out truck artwork.
2. Get creative and colour in and design your Scania truck.
3. Have an adult help you cut out the truck by cutting around the solid outer pink line. The dotted lines are folds.
4. Cut slits in the tabs on the front and back where there are thicker pink lines. The tabs on the sides will slot into these.
5. Put your masterpiece on display.
