

THE SCANIA INTERLINK HD FINESSE

Finesse

SCANIA

OUR HERITAGE

From its foundation in 1891, Scania's culture of continuous innovation has made it one of the world's leading manufacturers of buses and coaches.

This extensive industry experience has now been used to create the latest member of the Scania Bus and Coach family – the Interlink Finesse.

WELCOME ABOARD

Designed with both you and your passengers in mind, the Interlink Finesse is comfortable, spacious and incredibly versatile.

With the option to tailor elements including the internal layout, door positions and overall lengths, you're able to create a fully customised coach that meets the demands of your business.

AN EVOLUTION

The design team in Lahti, Finland, have created a coach that is modern and contemporary yet remains instantly recognisable as a Scania Coach.

Alongside the updated styling of the front, rear and wheel arches, the introduction of a wedged shaped front provides better aerodynamics, and improved fuel consumption and turning radius.

YOUR PASSENGERS

Welcome passengers aboard with premium quality interior design, climate control and more space to store luggage.

The improved shallow aisle makes it easier to move inside the coach, while deeper side windows allow more light into the saloon and a better view out of the windows. Comfort is key, and with leather seats, magazine holders, footrests and USB charging points, your passengers will soon feel at home.

JOURNEY FURTHER

Greater fuel efficiency is good for business, good for passengers and good for the environment. That's why the Interlink Finesse includes a 13 litre 410 HP Euro 6 engine for the ultimate in performance.

This engine gives class leading high torque at low revs, delivering a smooth, powerful drive and superb fuel economy.

WHY CHOOSE SCANIA?

Innovation, training and expertise are essential components for any successful business. As a member of the Scania family, you can gain access to premium services that help your business thrive.

From official product training to ongoing support from the dedicated Service Network, Scania offer a complete support solution for total peace of mind. Having Fleet management data at your fingertips will also assist your business in achieving the best possible efficiency of operation for your new Coaches.
