LIVING THE SCANIA BRAND

At Scania, we develop all our products with the same care, responsibility and quality – regardless if it is a new truck, service solution or a jacket. Great solutions are derived from brilliant ideas, comprehensive know-how, thorough planning, unique design and ingenious engineering. Followed by continuous improvements and refinement, always with our customer in mind. The same meticulous care is put into choosing the buttons for a shirt or the leather for a watch strap, as it is when refining a nut or bolt to gain a couple of decimals in fuel efficiency. Because “genuine Scania” means nothing less than perfection.

It goes without saying, our philosophy of sustainability goes into everything we do. We work hard to find the right partners who share our values and strong focus on quality, responsible production and the use of environmentally sound materials. We establish strong relations with suppliers who, like us, understand the importance of attention to detail. This approach has helped us to deliver products tailored to your needs for more than a century. We will continue this journey accompanied, as always, by dedicated drivers, owners, coworkers, and everybody else who loves the Scania brand as much as we do.

Our merchandise assortment represents a vision to contribute to circular consumption, where timeless products are used for a long time, and when no longer used, the material flows into something new. By setting the right demands we want to push the merchandise industry to develop and contribute to research. And of course, make it easier for you to make a better choice. Together we can make a difference.

We are humble to the fact that this is a continuous journey, and that we will never be done. The choices you make to reduce the environmental impact are often complex and multi-layered combined with a rapid development. Therefore, we do not say that we are good or better, but we do say that we have made the best possible choices to the knowledge that we have had, with the aim to always get better.

Continue reading to find out more about the stories behind our development and how our responsible thinking can involve both coffee grounds and used bottles! You are invited to explore our range of unique Scania products so that you can live the brand just as we do.
TRUE PREMIUM, FOR YOU

The persons who know Scania the best – the drivers – and who spend days and nights on the roads expect no less than quality in every detail.

Starting with a blank sheet, desired functions, features and qualities of the garments are added. Designed in co-operation with the same team that designs our trucks and buses, to get the true Scania look and feel. The fit of our clothes is a result of many years of continuous development. Also, samples are made and evaluated together with drivers. The process is not completely different from how we develop a vehicle, engine or service. Every detail is there for a reason.

All garments are designed for your comfort and safety, be it an extra-large, adjustable hood, a hidden cuff inside the sleeve or an enforcement tape inside the shoulder seams. To enhance visibility, jackets, bags and beanies have decorative reflective details. There are numerous examples of user-friendly design, for the best and most demanding drivers in the world.

Making a conscious choice
All garments incorporate conscious choices that consider ways of production and materials, starting from the first design ideas. They are developed with the same care, responsibility and focus as all Scania products. True premium, for you.
Keyring Truck
The new generation of Scania trucks is the embodiment of style, pride and absolute capability. Carry it along in a keyring with the new cab design. Colour: Metal/silver (2767746). Material: Metal coated solid brass. Details: True collector’s item, made in Sweden.

Sportmaster

Truck Jacket 2.0 (MEN)
At Scania, we are always on the look-out for clever ideas and solutions that contribute to better well-being and support an active lifestyle. Take the S’Café technology, for example – an idea as brilliant, as it is simple.

Two common household waste materials, coffee grounds and plastic bottles, are used as core ingredients in an innovative fabric with great functional properties. Five recycled PET bottles and three cups of coffee are amazingly combined into one of our functional t-shirts.

**Efficient processes, superior functions**
Produced using water- and energy efficient processes, the technology works by mixing coffee grounds throughout the yarn extrusion process. The grounds’ unique core structure and pores are key to form the superior material, featuring cooling and fast drying properties with exceptional odour control. Functions perfect for an active lifestyle, at work or in your free time.

Recycling of materials is, however, only a first step. To further reduce the environmental impact from synthetic textiles in future, Scania participates in a research project called MinShed together with several fashion and furniture companies.

The Scania range of functional garments comprises jackets, t-shirts, fleeces and socks. All carefully selected to match our requirements regarding high functionality and unique Scania design. And of course, a level of quality that everyone who knows Scania has naturally come to expect.
Technical T-shirt (WOMEN)
Comfortable clothing that breathes, controls odour, dries fast and is made from sustainable materials. **Size:** S-XXL, regular fit. **Colour:** Grey mélange (2742155-159). **Material:** 55% polyester, 45% S’Café polyester®. **Details:** Cropped Griffin on front, Scania wordmark on sleeve, flat lock hems.

GREEN AND CLEAN CYCLING

Re-cycling for cycling
The Tour of Nilgiris is today one of the largest and most loved bike tours in India. Over 7 days, cyclists of all grades, from amateurs and professional riders to Olympic winners, are tested across a route which includes over 900 km of curves, speedways and, at times, challenging terrain – not to mention, three states and wildlife sanctuaries in southern India. The Nilgiris tour is famous for its high turnout of participants riding on behalf of charity; from child-related and livelihood causes, to environment and health issues. Every year, bits are added for a better future.

In 2017, approx. 120 riders from all over the world participated, from amateurs to professional riders and Olympic winners. Scania was represented by Mikael Kyander, a long time Scania employee who competed in Scania-branded cycling wear.

Cycling is part of our proud heritage, dating back to the year of 1900 when Scania started producing bicycles. This, as well as the obvious benefit that cycling provides to overall health and wellbeing, is why we choose to include a range of cycling attire as part of our assortment. The collection of 2018 is black, produced from recycled materials in a responsible production process, and of the same high quality you naturally expect of Scania.

A JACKET FOR ANY OCCASION

For many years, our driver’s jacket has been a true favorite among truck drivers. We have developed it together with drivers to find the right design and functional details. All to create a jacket that is fit for the everyday life on the road, and with a design that works just as well at home.

Besides the driver’s jacket, we offer a wide assortment of Scania jackets adapted for different needs, tastes and climates. They all share the high-quality perfect fit and typical Scania design elements. Effort is put into even the smallest details, from the Scania logo on buttons and pullers, as well as numerous carefully placed pockets. For increased safety, many jackets also feature reflective details integrated into the design.

With the aim to offer products that are better for the environment, we have put extra effort in selecting materials and suppliers, not compromising on the high level of quality. Fabrics and paddings are to a big extent made from recycled materials, such as PET bottles. Some fabrics have been specially developed for Scania in order to create a recycled fabric with the right look and feel.

Super soft, ecological lambskin
The leather in our new leather jackets is something extra. Super soft lambskin, with the type of quality that will age beautifully over generations. The lambskin is an additional product from ecological sheep farms in New Zealand. Farms that put pride in good conditions for the animals and fulfil our animal welfare requirements. The leather is tanned with an alternative method that is more environmentally friendly. The end result is a soft, smooth and resistant leather.

So, which jacket will be your favorite?

---

Sportmaster

A TIMELESS AND CIRCULAR MATERIAL

Glass is a beautiful material. It is strong, yet fragile. Hard, but at the same time light as air. The ability to shape it into various forms and expressions has long been appreciated through history and is considered an art form. You can recycle glass over and over again, enabling a circular system.

The timeless glass pieces from Glasbolaget which feature in our assortment are produced with care and designed to be appreciated as a nice gift and cherished through generations. To improve sustainability, the furnaces used in the production are fuelled by biogas from organic waste. They represent true craftsmanship and the vision of achieving a sustainable future for Swedish glass.

Simply put, pieces of art for everyday use.

A NATURAL HIGH-PERFORMANCE FABRIC

Wool is a fantastic material with a number of characteristics that man-made fibres can only dream of. Produced in the right way, it is also a good choice with concern both for the animals and the environment. That is why we offer some exclusive wool products such as blankets, sweaters and hats.

Wool can breathe, absorbing moisture from the body and releasing it into the air, just like a modern high-tech material. The fibres are elastic and durable, which makes it comfortable and long lasting. It helps you to stay warm in the winter and cool in the summer, is naturally rain repellant, odour-resistant and cleans itself.

A wool garment should be aired frequently and seldom washed. Cared for in the right way, it will be with you for many years.

The wool in our products derives only from farms where animals are cared for in the right way, providing better welfare for the sheep.

One of the products in the assortment is a soft eco-wool blanket, a piece of genuine craftsmanship produced exclusively for Scania by Klippan Yllefabrik. Dating back to 1879, the company has built its proud reputation on an exquisite blend of Swedish design, a long tradition of textile knowledge and sustainable production.
Zip Contrast Cardigan, see page 039.

LONG LIVE CRAFTSMANSHIP

If you look closely at our brass key rings you will see the high level of detail and quality finish. It’s all about craftsmanship and precision in every detail.

The small company Svenska Medalj is the name behind some of the most renowned medals in the world, such as the Nobel Prize medals and Sweden’s H.M. The King’s medals. They are also long-term designers and manufacturers of brass keyrings and other exquisite metal work in the Scania collection. The company has genuine material knowledge and true craftsmanship, using well-proven instruments and machines (in fact, some of their stamping tools are over 200 years old). However, a traditional production is not necessarily old fashioned. Thanks to a modern way of thinking, they have created a sustainable production and circular flow by recycling and reusing material. A mindset that perfectly matches that of Scania.

The watch on your arm often becomes a true companion through life and a beloved accessory. At Scania we value the need for quality and reliability for a watch, just in the same way as for our vehicles. In addition with a timeless Scania design and in V8, XT or heritage styles.

Since a few years our watches are of proven Swiss Made quality and precision – providing only the best craftsmanship, technical competence and innovation, as well as aesthetic values. A commitment that fits well with Scania's drive for innovation, quality, design and craftsmanship.

**Quality in every detail**

Each watch is assembled, controlled and packaged manually by watchmakers who have been extensively trained and are professionals in their field. Care and handwork are at the core of each working step. In this way, every watch is guaranteed to offer the prestigious Swiss watchmaking tradition.

Each watch in our range has sapphire coated crystal glass that is extra resistant to scratches and also has water resistant qualities. In order to ensure the quality and accuracy of each timepiece, only superior movements of the Swiss manufacturers ETA, Ronda and Sellita are used. This new watch collection is provided with an extra-long warranty, now covering five years, with the possibility to have your watch repaired at our supplier should it be needed.

**The next step – solar watches**

Our 2018 collection features the new limited edition solar-powered timepiece, a natural step on our journey to make better choices for our planet.

CLASSIC DENIM LOOK — WITH A TWIST

Stonewashed denim never seems to go out of style. Getting that perfect feel and more or less worn look, traditionally requires manual work and large amounts of water and energy. The Scania denim jeans are made from organic cotton, with an innovative laser technology to get that authentic feeling and timeless, classic look.

A thrifty process
At Scania, we continuously strive to expand our collaboration with innovative, renowned partners, such as Jeanologia. Their unique treatment of fabric, uses laser and ozone in a sealed process to create unique “washed” designs. This ingenious technology does not only minimise the use of water, chemicals and energy; it also contributes to improved working environment.

Designed for comfort
Our denim jeans are specially designed to be comfortable both behind the wheel and when relaxing at home or playing with your kids. The jeans come in two styles, classic or relaxed fit. The latter have pre-bent knees and pockets adapted for driving. Every detail is there for a reason, designed for and by Scania drivers.
A NATURAL SHIFT

Cotton products such as t-shirts, hoodies and caps have continued to be among the most popular items in our assortment for many years. The same goes for towels and bed sheets. Besides selecting a premium quality that is comfortable to wear and will still look good wash after wash, we have chosen to switch to certified organic cotton for almost all of our cotton range. To us, this is a natural step in offering products made in a responsible way.

Certified organic cotton
Certified organic cotton has been cultivated and harvested without use of chemical pesticides or fertilisers. The entire cotton farming is based on local and renewable resources, where the farmer is obliged to conserve natural resources, preserve the long-term fertility of the soil, and create the largest possible recirculation of nutrients.
Classic Scania Zip Sweatshirt (WOMEN)
The satin embroidery gives this zip sweatshirt a nice, feminine Scania look. **Colour:** Old pink (2757925-929), Broken white (2757920-924). **Material:** 100 % organic cotton sweat, non-brushed. **Details:** Scania symbol badge on chest, Scania wordmark satin embroidery patch on sleeve, contrast colour zipper, V-shaped pipings on front and back yoke.

When emotion meets logic

The current Scania V8 engine in the New Truck Generation is the perfect match between excellent reliability, and outstanding performance. This is the result of decades of innovation and development, carried out by our designers and engineers in close co-operation with the true experts – people like yourself. Together, we have turned the Scania V8 into a legend in the industry.

A unique collection

To honour Scania V8 lovers all over the world, our designers have created a unique collection of V8-designed clothes and accessories. A collection evolved from the same foundation that has formed the development of our vehicles and engines – great functionality, reliability and user satisfaction, coupled with the ambition to continuously develop our assortments to incorporate more responsible and sustainable choices.

A TRIBUTE TO ALL V8 LOVERS

Scania V8. The mere phrase puts a smile on the face of truck drivers and operators all over the world. Ever since its first launch in 1969, the Scania V8 has received overwhelming response. The impressive performance, significant design, and the typical, powerful rumble of the engine are features that have attracted truck lovers over decades. Our V8 collection is a tribute to these people.

CELEBRATING A PROUD HERITAGE

Through our almost 130 years long history, Scania has become synonymous with quality, design and evolution through continuous innovation. A unique heritage full of fantastic products which still continues to engage and create emotions. At Scania, we feel honored and privileged to represent a brand with such a long history and dedicated fan base. This collection celebrates our proud heritage through a selection of products featuring powerful logotypes from our history. A must have for all Scania fans.

There are a lot of classic old Scania vehicles out there, surprisingly many still in good condition, renovated by enthusiasts. Only in Scania’s own collection there are around 80 vehicles, the oldest dating back to 1903.

The retro Scania logos are in themselves a treasure, with an expression typical for the period in time they are representing. The griffin has a central position in Scania’s history since 1901. The shape of the pedal crank from the original bicycles was combined with the griffin from the coat of arms of the city, where Scania originates from. Elements that are still today representing Scania.

You will find a wide range of products in our assortment, all of which feature popular heritage logos from years gone by, from t-shirts to brass keyrings.
Celebrating your closest friend and partner on the road, indulge in this vintage chronograph, a true collector's item.

**Colour:** White dial, stainless steel.
**Material:** Sapphire coated crystal in stainless steel 42.5 mm case.
**Details:** Ronda 5021.D, red brown leather strap, Scania Vabis logo on dial. Water resistant 100M. Swiss made. 5-year warranty.

SCANTIA XT
BOLD AND READY FOR THE TOUGHEST CHALLENGES

Heavy duty operation in the roughest conditions is no match for Scania’s XT truck range. Robust and reliable like no other, the XT range is a result of our proud heritage, modular engineering and extensive field testing. The bold, powerful expression of the trucks is reflected in our XT collection, specially designed for those who are always up for a challenge.

Keeping up productivity when operating in tough conditions calls for tailored solutions. XT is a performance step that is available on our entire cab range and engine range, with endless configurations to suit your needs. We will tailor your XT vehicle with your business and application as the starting point, allowing you to set industry standards instead of settling for them.

Robust and durable in every detail
When our engineers and designers created the XT truck range, they fine-tuned even the smallest details to make the biggest impact. The designers behind our XT collection are no different – the same care and attention has been put into creating a unique selection of clothes and accessories, all with the distinctive, powerful and robust attitude that is so typical for Scania XT.

Kids King of the Road T-shirt, see page 103.
Kids Regular Front T-shirt, see page 103.
The king of all creatures

The griffin is strongly associated with Scania and highly appreciated by our fans. But do you know what a griffin actually is and how it came to be part of Scania?

A powerful, majestic creature
The griffin is a legendary creature with the body, tail, and back legs of a lion; the head and wings of an eagle; and an eagle’s talons as its front feet. As the lion is traditionally considered the king of the beasts, and the eagle the king of birds – the griffin has always been considered especially powerful and majestic, indeed the “king of all creatures”. How appropriate, as Scania has been, and indeed remains to this day, the king of the road.

At the heart of Scania
The griffin has a central position in Scania’s history, beginning in 1901 with the first trademark of Maskinfabriks Aktiebolaget Scania in Malmö. The griffin has been borrowed from the 15th century coat of arms of Malmö city. However, the Griffin hasn’t always been part of the Scania trademark. Between 1969-1984, the iconic creature took a short hiatus, only to make a long-anticipated comeback shortly thereafter. The new symbol included a griffin with a golden crown, which recently was updated to platinum.

Interestingly, over recent decades, the griffin has come to be a cherished landmark in Södertälje. It stands to this day on the roof of Scania’s head office where it helps visitors to find their way.

Our new Griffin plush is the perfect companion for all small Scania fans. With its protective and loyal personality, while being cuddly and soft, is sure to give comfort and be a firm favorite.

THE KING OF ALL CREATURES

Sapphire coating features
Sapphire coating makes the crystal glass much more resistant towards scratches and keeps the watch in good condition for longer time.

CR-39 lenses
All shades in the Scania collection have CR-39 lenses with full UV-protection. The optical quality is superior, it’s half as heavy as glass and is more resistant to scratches and gives a better UV protection than for example polycarbonate. Full UV-protection is an important feature especially for professional drivers who spend many hours behind the wheel in ever changing weather conditions.

Mulesing-free wool
Scania has made the decision to only use certified mulesing-free wool, thereby guaranteeing that no animals are harmed during the shearing process. A natural choice for Scania and totally in line with our responsible and sustainable approach.

Water resistant / Waterproof guide for jackets
With best-in-class standard in every detail, the Scania jackets will keep you warm and comfortable in all weather conditions. A closer look at the label will reveal technical information about the fabric. Here is a brief explanation of the abbreviations:

- CO Carbon free
- WR Water resistant. To repel light water on contact, general grade between 1,500-5,000 mm
- WP Waterproof — to repel water on contact, general grade minimum of 10,000 mm

PU coating
MP Breathability gm/m²/24 hr

<table>
<thead>
<tr>
<th>Water resistant grading scale mm</th>
</tr>
</thead>
<tbody>
<tr>
<td>1,500-5,000 mm</td>
</tr>
<tr>
<td>5,000-10,000 mm</td>
</tr>
<tr>
<td>10,000-40,000 mm</td>
</tr>
</tbody>
</table>

N.B. The WR-effect can vary depending on the amount of time that the garment is exposed to rain

MP Breathability performance
| <4,000 gm/m²/24 hr | Low |
| 4,000-8,000 gm/m²/24 hr | Moderate |
| >8,000 gm/m²/24 hr | High |

N.B. There are different ways of testing and measuring breathability, this is the most common way
