FOR THE NEW S- AND R-CABS, EXPRESSION WITHOUT LIMITS.

SCANIA VEHICLE ACCESSORIES
MAJESTIC IMPRESSION. TAILOR-MADE BY YOU.

You are proud of your new Scania. So are we. Your truck is an impressive sight that will turn heads. Better yet, you have every opportunity to reinforce your personal statement. Our range of accessories derives from research, development and close cooperation with the best brands on the market, as well as valuable input from the true experts – people like you. Let the coming pages inspire you, then go to Scania Vehicle Accessories Online to discover all you need to make the most of your vehicle. For enhanced fuel economy, improved vision, better comfort – or for the pure pleasure of having a truck that looks great.

The accessories featured in this brochure are merely a selection of our vast range. See the complete collection and detailed information on Scania Vehicle Accessories Online: accessories.scania.com
Elin Engström is an experienced test driver. She has travelled long routes through days and nights in all kinds of challenging weather. To her, the driver position is vital. “I’m quite tall and no other brand I’ve tried can match Scania when it comes to finding a comfortable driver position. It’s even better now when the driver seat and dashboard have been moved forward.”

Elin also appreciates the improved aesthetics of the new Scania truck. The startling cab design, with the characteristic front grille, side mirrors, and stylish interior, gives the truck a confident attitude. On top of this, the extensive range of accessories provides countless opportunities for personalisation. When asked to equip the truck of her dreams, Elin pinpoints her favourite accessories. “My firsthand choice would definitely be the V8 design package with leather seats. Then I would add aluminium rims, roof light bar, tail lamp, electric engine heater, air pressure gun, and exterior sun visor. Features like that make a great truck even better.”
CONQUERING THE ELEMENTS

Through sleet, snow and ice, on the roughest forest dirt roads, plunging through heavy rain at highway speed — test driver Peter Carlson has covered close to two million kilometers in the new Scania truck, in every imaginable weather condition. One can hardly question his driving skills, let alone his judgement. “Driver comfort is first-class, better than anything I’ve tried before”.

The new truck is incomparable on long journeys as well as in delicate, high-precision work situations, always showing off the Scania business-leading trademarks of unique adaptability and exceptional comfort and safety. Peter summarises his thoughts: “This truck is ideal in challenging situations, like timber loading in rough and dark environments. Apart from the new seat protecting your back on bumpy roads, the improved lighting equipment, with new lightbars, worklamps and rotating beacon, makes your workday comfortable and safe regardless of situation. Thanks to all the smart accessories, you can make your truck your perfect companion. Simply put, this is the best truck I’ve ever driven.”
ENJOYING THE SILENCE

Life on the road is special. It’s not for everyone, while others cannot picture themselves in any other environment. Over three years Patrik Holmlund has tried every version of the new Scania truck, from the early prototype to the magnificent vehicle we see today. He has travelled on icy Scandinavian roads way up north.

Patrik tries to funnel the most prominent characteristics of the new Scania: the muted sound, the improved visibility, the high-spec appliances in the cab, the striking appearance, and the overall comfort. “It’s quiet, stable and perfectly fit for purpose. New accessories like hubcaps and striping add to the impressive look, and improved features like the new mattress and sheepskin seat cover make cab life really enjoyable. I can hardly feel the miles in my body anymore, even after having spent many long hours on the road.”
We know all our truck owners and drivers have a soft spot for styling equipment. We know we do. And while you are busy saving fuel and driving comfortably – why not do it with style? Our styling solutions will not only strengthen your personal statement. You will also be more relaxed and satisfied in a truck that is more pleasing and better looking. A place that feels like you, like home.

The elegant hubcap with Scania symbol is available in either stainless steel or polished steel. It is adapted for single reduction axles on S- and R-series and can be used for vehicles with or without tyre pressure monitoring. Sold individually.
- Stainless steel, part no. 1861905
- Polished steel, part no. 1908390
SAFETY & SECURITY

ON THE MOVE FOR SAFER RIDES

Regardless of weather or road condition, your truck must present flawless performance every hour you spend with it. Explore our range of safety accessories with anti-siphon devices, worklamps, mudflaps, and other equipment that makes your Scania truck safer than ever. In addition, the extended range of lighting accessories enhances safety by providing several opportunities for improved visibility, ensuring that both you and others on the road are presented in the best light.

The accessories featured in this brochure are merely a selection of our vast range. See the complete collection and detailed information on Scania Vehicle Accessories Online: accessories.scania.com
**Anti-siphon device**
This robust and durable Scania anti-siphon collar acts as an efficient preventer of fuel theft. Fast and easy fit – no gluing, drilling, or damage to tank neck. Interchangeable and available for all vehicle types. Part no. 2457921 (high version), 2467923 (low version).

**Mudflaps with spray suppression**
Reduce wheel splatter and water spray to increase safety and comfort for others on the road. The mudflaps with printed Scania wordmark and V8 symbol, are made of black, sturdy plastic. Fits both left and right sides. Part no. 1922448 (left side), 1922449 (right side).

**Work lamp**
Make sure your work environment is as safe as possible. The robust and powerful Scania-branded LED worklamp has black alu housing, hardcoated lens, steel bracket, and IP69K water protection class. Part no. 2193177.

**Roof-mounted warning system**
This low-profile, roof-mounted warning system is an effective way to make others pay attention to you. Providing dependable safety regardless of situation, the warning system comes fully equipped with amber LEDs in all positions. Easy wiring and connection. Standard brackets are included. Part no. 2614249.
Roof light bars
The roof light bars in polished stainless steel serve as robust and stylish carriers of extra lights, ensuring that you see, and are seen on the road. Shown here is the long version featuring styling LED including four Cibie Super Oscar LED chrome lamps. Sold separately or in complete kits. Part no. for kit 2603738

Front light bar
Enhance your vehicle’s appearance through these attractive and durable front light bars in polished stainless steel. Shown here is the front light bar with styling LED including two Cibie Oscar and two Cibie Super Oscar LED chrome lamps. Sold separately or in complete kits. Part no. for kit 2603728

Spotlamp
Maximise visibility and safety by mounting powerful spotlamps. To the left is the NBB Alpha 225 Xenon with LED position lights and sturdy black housing. Ref. 20. Part no. 2447615.
To the right is the NBB Alpha 225 Pro with LED position lights, black housing and chrome rim. Ref. 45. Part no. 2447613.

Cibie spotlight
Classic design with the latest technology. This Cibie Super Oscar LED spotlight features LED position lights, black housing and chrome rim. Ref. 27.5. Part no. 2447399 for black housing. Part no. 2447400 for chrome housing.
CornerEye camera
Improve safety of the surrounding area and secure excellent view of the blind spots around the truck. The robust CornerEye camera combines advanced technology with effective application solutions and exceeds current safety regulations. Detailed live views are sent to the HD monitor, thus simplifying working conditions while enhancing safety and comfort. Part no. 2621566

Class V and VI are the minimum legislated requirements.

FAMOS 102° Mirror rear view camera
Optimised view in all directions maximises safety. The rear view camera lets you see the area immediately behind the truck. When reverse gear is selected, the monitor on the premium radio automatically switches to camera view, supplying the driver with reliable information in any kind of weather or working conditions. Scania offers a broad variety of rear view cameras and installation options. Part no. 2545696
COMFORT

ALWAYS IN PERFECT STATE OF MIND

Long hours behind the wheel and overnight stops along the road. A relaxed, ergonomic driver position is as essential to your well-being as a comfortable bed and healthy cab climate. Find the accessories that keep you just as alert during work hours as you are at ease and relaxed when resting – for the enjoyable truck life you deserve.

The accessories featured in this brochure are merely a selection of our vast range. See the complete collection and detailed information on Scania Vehicle Accessories Online. accessories.scania.com
Beds
A relaxed driver is a safer driver and a comfortable mattress ensures nice resting and sleeping accommodations. Choose between pocket, bonell or foam. Pocket, part no. 2255736. Bonell, part no. 2255737. Foam, part no. 2255738.

Mattress topper
For extra comfortable sleep, complete your mattress with a specially designed mattress topper. Part no. 2231388
Bycool Compact 1.4
Mainly used for cooling the cab during nighttime rest periods and loading/unloading operations, the ivory white Compact 1.4 has a cooling capacity of 1400 W. Part no. 2542519

Bycool Compact 3.0
The Compact 3.0 with 3,000 W cooling capacity, is mainly used for cooling the truck cab during overnight resting periods and loading/unloading operations. It can also be used as an additional cooler when driving in warmer climates. Part no. 2542520

Bycool SLIM
A parking cooler mounted in the roof hatch maintains a comfortable temperature inside the cab during loading and unloading operations. Moreover, it reduces idling, prevents atmospheric emissions, and leads to reduced fuel consumption. Bycool SLIM 1400 W is electric, compressor-driven, and the most low-profile cooler in the range. Part no. 2542518

Note – all coolers featured on this page are available from Q2 2017.
Waeco coffee maker
This 24 V, 5-cup coffee maker is equipped with mesh filters, transparent water container with marked cup capacity, and a bottom plate for securing in the cab. The coffee pot is secured while the vehicle is being driven. Part No. 2439387

Cool box
The 21-litre cool box features a 7-step thermostat, allowing cooling to approx. 30°C less than surrounding temperature. It keeps an inside temperature of 1–15°C and has room for 2 litre PET-bottles. Part no. 2051846

Note – available from the end of Q1 2017.
V8 mat
Stylish textile and leather mat for R- and S-series vehicles with V8 symbol and red design details. Available for engine tunnel, passenger and driver. Part No. 2393587

Storage box
Keep track of your belongings in the cab by mounting one or two storage boxes under the bed. The mat on the bottom facilitates cleaning and the rubber band under the box can be used for hanging for example wet gloves. Part No. 2449591

Waste bin
A tidy cab increases your comfort on the road. This stylish Scania-branded waste bin is equipped with a hook and velcro tie on the back for easy and flexible fastening in the cab. Part no. 2116993
Sheepskin seat cover
The Scania sheepskin seat cover ensures that you can sit more comfortably during long drives. Wool's warming and cooling properties makes the seat pleasurable in all temperatures, as it has the ability to absorb moisture. The sheepskin cover is also pressure-relieving and adds a homey feeling to the cab. Part no. 2531532
