POWERED BY SCANIA

WHEREVER THERE ARE SUBSTANTIAL DEMANDS ON RELIABILITY, EFFICIENCY, AND ENVIRONMENTAL CONSIDERATION, A SCANIA ENGINE IS JUST WHAT YOU NEED.

Scania has manufactured engines for more than a century. Today we produce around 90,000 engines a year for trucks and buses, as well as for marine, industrial and power generation applications.

Our experience and competence form the base of our state-of-the-art engine range, combining excellent performance and low total cost of ownership.

With over 98% parts availability within 24 hours in North America, and over 1,900 service points worldwide, of which approximately 300 are strategically located in North America, assistance is always close at hand. We maximize your uptime so that you can focus on what matters – your operation.

INDUSTRIAL ENGINES

Our Tier 4f industrial engine range reaches from 275 to 770 hp, and 200 to 400 kW for power generation engines. All Scania Tier 4f engines are able to meet emission standards without the need for a Diesel Particulate Filter (DPF).

MARINE ENGINES

Our commercial marine engine range reaches from 220 to 1,150 hp (162 to 846 kW) for propulsion applications and from 199 to 640 kW for auxiliary applications. Corresponding figures for the new IMO Tier III engines are 350 to 550 hp (257 to 405 kW) and 269 to 596 kW.

SCANIA ASSISTANCE

If the need arises, one call 24/7/365 locates the closest technical assistance and facilitates the entire repair cycle. The Scania Assistance representative monitors all aspects of the process, locating parts, expediting repairs and minimizing downtime.

Call 1-800-2-SCANIA (1-800-272-2642). To speed things along make sure you have your engine serial number and your location ready.
