LIMITED EDITION

“FROST” BY SVEMPA

HOW FROSTY DO YOU FEEL?

Inspired by the Frostfire show truck, Svempa and his team will take your wishes and customisation choices – and create a limited-edition Frost themed custom Scania S-cab tractor.

As true legends of custom trucks, Sven-Erik "Svempa" Bergendahl and his stable-mate Jan Richter should need no further introduction. Directly inspired by their latest creation – the Frostfire – a Frost edition of the S-cab Scania tractor is now being made available for customer orders. And the exact design and customization choices are up to you.

The trucks will be brought to Svempa's own custom workshop

in Stockholm, where the team will customise it with the design aspects you choose. With exterior choices ranging from the paintjob and striping colour choices, unique V8 fins for the doorhandles, rear honeycomb lamp covers, chromekit wheelrims and hub covers as well as front grill trim LED lighting. And interior design aspects such as custom design brown leather seats and perforated leather steering wheel with frost colour matched custom stitching, brighter roof lining

and side panel lighting, and the numbered rear wall panel. To name some of the options.

So, do you want the chance to spend each and every workday in the luxury of a custom Svempa truck? Here it is.

The original Frostfire truck was built to celebrate the 50th anniversary of the Scania V8.

Design choice examples
