

SCANIA MONITORING PACKAGE

Get an at-a-glance overview of your fleet performance – free of charge. Track your carbon dioxide emissions and identify if any vehicles are deviating in terms of fuel consumption, distance driven or exceptionally high idling through weekly, monthly and yearly reports sent as a personal link via email.

SCANIA MONITORING PACKAGE

After signing a connectivity agreement with Scania, the Monitoring Package is automatically activated free of charge for all connected vehicles in your fleet.

The monitoring package will then continuously generate automatic reports of vehicle data from each previous time period: Week, Month or Year. The reports are sent as a unique link via e-mail and provides a great way to easily spot trends compared to previous reporting periods. You can also easily manage the recipient list for the reports by adding or removing email addresses – ensuring that any colleague who you believe could benefit from the overview will also receive it. And if you are also a subscriber of the Scania Control package – the reports provide direct links into your My Scania fleet management tools where all your data can be reviewed in more detail.

With the Monitoring Package, our Service planning feature and basic functionality in the Scania Fleet app also comes included.

Quick facts

- Tracks parameters such as: Fuel consumption, Odometer, Distance driven, Driver support score, Harsh braking, Coasting, Idling and CO₂ emissions.
- Reports sent as unique links via email.
