

SERVICES 360

# PLUS

## **Powertrain repair coverage, intelligent vehicle maintenance, as well as digital tools and services**

Even with proper maintenance, component failures occasionally happen. The Powertrain Repair service in our Plus package can be your solution to minimise any impact on productivity with repair coverage focused on your most critical vehicle components, further combined with smart vehicle specific flexible maintenance plans to maximise time spent in operation.

We can promise that we'll always get you going again as fast as possible through first hand access to genuine Scania spare parts, and a service network with more than 1,800 workshops and technicians that know your powertrain inside and out.

# PROTECT WHAT MATTERS THE MOST WITH DIGITAL SERVICES, MAINTENANCE AND REPAIRS

The best way to keep your powertrain as well as the rest of the vehicle in top shape is of course proper maintenance. Each of our four services packages is therefore based on our Flexible Maintenance service – which creates a unique vehicle specific maintenance plan based on the vehicle's operational data. With the Services 360 Plus package you also get a full suite of digital tools and services, to improve the efficiency of your fleet management through automating and streamlining tasks, and increasing your fleet overview and insights. For further coverage with the Plus package, you can also add optional add-on services such as Expanded Powertrain Repair or Towing – or take a look at our Services 360 Full package to include repair coverage for your chassis and cab, and the option to include our Max24 priority service.

## **Standardised, but still tailored**

The Services 360 Plus package may hit the sweet spot for many operations, but our goal is to find the sweet spot for everyone. Your needs always come first to us, which is why we see each of the packages as a minimum services setup that we can offer consistently all across Europe. After finding the right package to work from, we can always tailor it further with add-on services or any particular tweaks or changes you feel would make the offering more worthwhile for your operation.

### *Services included:*

- Control Package
- Flexible Maintenance
- Powertrain Repair

### *Add-on services:*

- Expanded Powertrain Repair
- Towing
