

SCANIA PARTS

GENUINELY BETTER

SCANIA

YOUR SCANIA. OUR KNOWLEDGE. NO COMPROMISES.

Welcome to the new issue of Scania Parts filled to the brim with everything you need to keep your vehicles on the road and performing to their full potential.

While you peruse the latest and greatest product range available for your Scania, don't forget our Support Centre team in Milton Keynes, and all the teams across our 84-strong nationwide service centre network are here to help you get the best from your vehicles.

It goes without saying you've bought the best, so they deserve the best service, and above all, the best parts.

What makes each of our Scania parts special is the extensive and rigorous testing they go through, to make sure they match our exact production specification and standards.

But why does that matter? Quite simply, it means your Scania will be ready for whatever job you choose to test it with, even in the most difficult or extreme operating conditions.

By choosing genuine Scania parts, you are limiting the amount of time that your vehicle needs to be off the road. Plus, each part is supported by our 24-month nationwide fitted parts warranty.

If the unspeakable does happen. Fear not. We will work quickly and efficiently to get you back on the road. Uptime in no time!

Our dedicated service centre network have direct daily access to our global parts centre in Oudsbergen, Belgium, and our national parts centre in Leicestershire, with over 190,000 product lines and £160M invested in our parts stock, to deliver the parts that you need to keep your business moving.

Over the coming months you may notice some differences with our packaging materials for our parts, as we move towards greater use of biodegradable and reusable packaging. Another small step underpinning our sustainability targets, as we strive towards our goal, "Driving the shift towards a sustainable transport ecosystem".

Here at Scania, your business is as important to us, as it is to you.

Our commitment is Customer First, to us that means right part, on time, every time.

Enjoy your copy of Scania parts, and don't forget to contact your local Scania service centre, for your Scania experience.

SCANIA UK

FILTRATION

Scania filters are expertly designed, rigorously tested and precisely matched to your powertrain and its maintenance plan.

AIR FILTER

SC2341657

A Scania air filter is precisely engineered to the perfect balance between filtering performance, service life and low restriction. That way, you know that your engine will always be protected from particulates, but without taking a hit on performance, fuel economy or uptime.

REPAIRING YOUR VEHICLE THE COST EFFECTIVE AND SUSTAINABLE WAY

 INTRODUCING THE SCANIA SERVICE
EXCHANGE PROGRAMME.

KEEPING YOUR SCANIA AT IT'S VERY BEST NEEDN'T COST YOU THE WORLD.

By choosing a Scania Service Exchange part, you can get all the confidence associated with the genuine Scania part for a reduced price – and do your bit for the environment.

What is this magical Service Exchange programme you speak of? We hear you say.

It forms part of Scania's "Driving the Shift" philosophy, which has a focus on sustainability and eliminating waste. This includes limiting the impact our replacement parts have on our planet.

Sometimes the inevitable happens where worn parts need to be replaced. It may be the case that it is uneconomical to repair or replace it with a brand new Scania part.

That's where Scania's Service Exchange programme comes in.

Giving you access to an industry leading range of remanufactured components, including and not limited to turbochargers, clutches, and rotating electrics, all at an attractive price.

Here's the best bit though. Each part is remanufactured to the same Scania specification and quality as its brand new equivalent part, covered by the same warranties, and will ensure your vehicle is back on the road quickly and economically.

Why not feel good about your new purchase. The worn part from your vehicle, if it's in good enough condition, can be remanufactured into a new Scania service exchange part. Saving the environment from another item heading to landfill.

By choosing Scania Service Exchange Parts, you'll be helping us reduce the impact we have on the environment. This includes using less raw materials and energy, which in turn means less CO₂ emissions produced.

It's the same Scania quality you can count on for an attractive price, and you can make a positive contribution to the environment, when making your purchase.

Scania's Service Exchange Parts – what's not to like?

COOLANT PUMP

SC0575052

We develop and test our pumps in-house to ensure high capacity, reduced wear, and long service life. All from the unique cast iron mix of the casing, the special plastic mixture for the perfectly balanced high-capacity impeller to the large bearing designed for maximised life span.

SAVING OF **£15.50**

The pretension in the belt circuit is affected by all interacting components, but primarily by the quality of the drive belt and belt tensioner. The drive belt must be of the correct length and rigidity for the belt circuit components to operate optimally and last a long time.

CAN YOU PUT A PRICE ON PEACE OF MIND?

24 MONTH
FITTED PARTS WARRANTY

By buying a Scania vehicle, you are buying peace of mind that it will be reliable, durable, and able to excel with whatever your business throws at it.

We also apply the same philosophy to our parts and service centres too. Every Scania OEM part fitted in a Scania authorised workshop comes with a 24-month fitted parts warranty. Or 730 days, or 17,250 hours, or 1,051,200 minutes of cover for your new part.

However you look at it – one thing is for sure.

Should anything go wrong with the part in that time, we will get it replaced and fix any consequential damage that may have occurred too! Giving you peace of mind that your choice to fit a Scania Genuine part is the right one.

And choosing a Scania OEM part comes with its own benefits. Each one has been designed and rigorously tested to meet our own exacting quality standards.

This means it functions reliably for the entirety of its service life. Which leaves you to focus on your business.

But did you know, should the worst happen that you're backed up by our 84-strong nationwide Scania service centre network and Scania Assist if your part was supplied and or fitted by our service centres? Any one of them can complete the rectification work!

Each one is filled with all the expertise and knowledge to carry out all the necessary repairs quickly and efficiently to get your vehicle back working hard for you once again.

We know your Scania is more than just a vehicle. It's a lifeline for your business – and nobody understands that better than us.
